COMPLIMENTARY SEARCH AND AI VISIBILITY REPORT

How buyers find Molsoft on Google and in AI answers

We checked your website, your Google rankings in Canada, and what Google AI Overviews say in search results. Here is what we found on 4 November 2026, and the fixes worth making first.

Prepared for
Molsoft
Montreal, software and e-commerce agency

Prepared by
xylvar
SEO and AI visibility for growing companies

Date
4 November 2026

1 The short version

A fresh snapshot, 4 November 2026. Public pages only, no logins. No email has been sent about this report yet.

AREA	VERDICT	WHAT IT MEANS
Google website rankings	FIX	Molsoft does not appear as a direct result in the summary top 8 or 9 for any of the 10 Google Canada searches in this run.
Local map presence	PARTIAL	Molsoft is #3 in the map pack for shopify development agency montreal, at 6570 Av. de l'Esplanade Ste 100. No Molsoft rating is published from that pack, because it returned rating null.
AI visibility in search	PARTIAL	SERP AI Overviews were returned for 3 of 10 searches. Molsoft is named in 0 of those 3. Live Gemini and Bing answers have not been checked yet and are marked as not yet checked.
Page structure	STRONG	8 of 9 audited URLs have exactly 1 main heading. The contact page lists the same heading twice.
Image descriptions	FIX	244 of 372 images on the 9 audited URLs have no alt text.
Speed	NOT MEASURED	PageSpeed Insights returned HTTP 429 on 4 November 2026. No score is claimed in this report.

Biggest issue: Molsoft has strong, long money pages, but none of them appears in the organic top 9 for its matching search in this run. The work is already on the site. The search job for each page is what is missing.

This report is complimentary and confidential to Molsoft. It is based on public pages and search results on 4 November 2026, not on any private data.

2 Where you rank on Google today

Google Canada, Bright Data SERP API, 4 November 2026. Direct-domain results only. Google redirect entries are not named as competitors, because their final destination is hidden in the redirect URL.

SEARCH	MOLSOFT	WHO IS AHEAD IN DIRECT RESULTS
shopify plus agency montreal	Not in summary top 9	Wikipedia, Montreal; Ville de Montreal. City pages, not agency pages.
shopify plus agency canada	Not in summary top 9	Kinex Media #1; DesignRush #2
shopify migration agency	Not in summary top 9	Shopify Help Center #1; Eseospace #2
shopify development agency montreal	Not in organic summary top 9; map #3, see section 3	Shopify partners directory #1; HelloDarwin #2
shopify pos implementation	Not in summary top 8	No direct-domain competitor named in the summary; entries are Google redirect entries.
shopify b2b agency	Not in summary top 9	Shopify blog #1; Charle Agency #2
ecommerce agency montreal	Not in summary top 9	Thrive Internet Marketing Agency #1; EcommerceGuide #2
shopify plus partner canada	Not in summary top 9	Kinex Media #1; Gorgias #2
magento to shopify migration	Not in summary top 8	Charle Agency #1; Shopify #2
unified commerce agency	Not in summary top 9	

Langara College #1; US Customs and Border Protection #2. Education and government pages, not agency pages.

The pattern is clear

Directories, list articles, Shopify itself, and other agencies hold the agency searches. Two searches return the wrong intent entirely in the direct results: city pages for Montreal, and education or government pages for unified commerce. A page that simply repeats the keyword will not rank for those searches. Each money page needs an introduction and FAQ that answer the exact question behind its search, and a link from the homepage and the expertise hub using that search wording.

3 What AI says in search results

Google AI Overview data captured through the SERP API, 4 November 2026. Live Gemini and Bing answers have not been checked yet. AI answers change day to day.

Returned, but Molsoft not named: 3 of 10

An AI Overview was returned for shopify migration agency, shopify b2b agency, and magento to shopify migration. Molsoft is named in 0 of those 3. The migration overview links the Shopify Partner Directory and iakoe.com. The B2B overview links Charle Agency. The Magento migration overview links a Reddit r/ecommerce thread. No other search in this run returned an AI Overview in the SERP API record, which does not prove a conversational AI tool would give no answer.

Why this matters for Molsoft

Your money pages already carry FAQPage schema for migration, B2B, retail POS, and middleware. That is the right format for AI answers. The gap is that those pages do not yet rank for their matching searches, so AI Overviews are citing directories, other agencies, and forums instead. Fixing the search job for each page is also the fix for AI visibility, because the same pages that rank are the pages AI tools are most likely to cite.

Local map presence

Map pack win: shopify development agency montreal

Molsoft is #3 in the map pack for this search, at 6570 Av. de l'Esplanade Ste 100, phone (514) 532-0326, Open, closes 6 p.m. in the pack. Ahead: Mindweb #1, Mount Royal, Quebec; EZShop, eCommerce Marketing Agency for Retail, #2. No rating is published for Molsoft from this pack, because it returned rating null.

Other map packs

For shopify plus agency montreal, Molsoft is not in the top 3: Shopify, Philippe Pasquin, and Buzztroop. For ecommerce agency montreal, Molsoft is not in the top 3: EZShop (4.4, 53

reviews in this pack), Courimo (4.9, 109 reviews), and My Little Big Web (4.8, 215 reviews). Those ratings are map pack figures from this SERP run only, not Molsoft figures, and not a separate review site fetch. No map pack was returned for the other 7 searches.

4 What is holding the website back

9 URLs audited on 4 November 2026, 14839 words, 372 images, 244 missing alt text. Sitemap lists 21 page URLs; the other pages, blogs, articles, and the French sitemap were not individually audited.

Duplicate heading - HIGH

The contact page lists the same heading twice: "Ready to build what is next for your business? Let us make it happen together." Keep one H1 and remove the duplicate, so Google does not have to choose between identical headings on the page that should convert.

Titles and descriptions - HIGH

Homepage title 64 characters and description 275 characters. Expertise hub title 76 characters and description 171 characters. Work page title 18 characters and description 293 characters. Strategy page description 162 characters. The four money expertise pages, at 42 to 48 characters and 141 to 149 characters, are already in range and are the model to copy.

Images without descriptions - HIGH

244 of 372 images in the audited set have no alt text. Worst: retail POS 41 of 56, middleware 35 of 52, migration 35 of 50, strategy 34 of 42, B2B 32 of 47, expertise hub 23 of 27, homepage 16 of 20.

Schema gaps - MEDIUM

Migration, B2B, retail POS, and middleware pages carry FAQPage plus Answer and Question schema. Homepage, expertise hub, strategy, work, and contact carry Organization only, except homepage SearchAction and WebSite. Copy the FAQ pattern to the pages that lack it, with real questions and answers.

Contact discoverability - MEDIUM

The audit tool found 0 public emails on the 9 audited URLs. If the contact page is the intended route, make sure a visitor can reach a human from every money page in one click, without hunting for an email address.

Strengths to keep

Every audited URL canonical to itself. Mobile viewport present on every audited URL. Each money expertise page is over 2,000 words with 1 H1. Robots.txt and llms.txt are present. The llms.txt file is a Shopify agent shopping guide, not a marketing description.

5 How you compare

From SERP direct domain results, 4 November 2026. Google redirect entries are not named as competitors.

PAGE	WORDS	H1S	SCHEMA	ALT MISSING
Homepage	875	1	Organization, SearchAction, WebSite	16 / 20
Expertise hub	2616	1	Organization	23 / 27
Migration and replatforming	2219	1	FAQPage, Answer, Question	35 / 50
B2B commerce	2112	1	FAQPage, Answer, Question	32 / 47
Retail and POS	2390	1	FAQPage, Answer, Question	41 / 56
Middleware and integrations	2095	1	FAQPage, Answer, Question	35 / 52
Strategy	1029	1	Organization	34 / 42
Work	1173	1	Organization	17 / 63
Contact	330	2	Organization	11 / 15

Competitors holding the agency searches in this run include Kinex Media, Charle Agency, HelloDarwin, DesignRush, Thrive, and Gorgias, plus Shopify directories and list articles. Those names are from the direct SERP results above, not from memory.

6 The fixes, in order

From the fresh data above, not a promise of a ranking.

- Give each money page a search job: a clear, search-matched introduction and FAQ answering the exact question behind its search, linked from the homepage and the expertise hub with that wording.
- Fix the contact page heading: keep one H1, remove the duplicate.
- Tighten titles and descriptions on the homepage, expertise hub, work, and strategy pages, using the money expertise pages as the model.
- Add alt text to the 244 images missing it, starting with retail POS, middleware, migration, strategy, and B2B.
- Add FAQ schema to the homepage, expertise hub, strategy, work, and contact pages, with real questions and answers.
- Use the local map win: keep address and phone consistent everywhere, and add a Montreal service page that matches the local search behind the #3 map pack result.
- Do not chase the two wrong-intent searches with a generic page. Target service plus location phrasing that already returns agencies, and use directories and partner listings for the agency searches.
- Make contact findable from every money page in one click.

7 What this becomes in 90 days

A shape, not a promise. No ranking or AI mention is guaranteed.

Days 1 to 30 - Fix the foundations

All quick wins above that can be done without new content, plus baseline tracking of the 10 SERP keywords, the 3 map packs, and the SERP AI Overview results, dated 4 November 2026.

Days 31 to 60 - Build the pages that can rank

FAQ schema rollout, Montreal service page, directory and partner listing checks, first two buyer guides for migration and B2B, each linked from its money page.

Days 61 to 90 - Review and set the next quarter

Review results, check whether the money searches and the map pack have moved, and set next quarter targets.

How we did this. We read 9 URLs on molsoft.io on 4 November 2026 (titles, headings, word counts, code markup, image descriptions, robots.txt and llms.txt). Google Canada results were collected via Bright Data SERP API on 4 November 2026, market Canada. Map packs are SERP API snack pack data where returned. Speed: PageSpeed

Insights returned HTTP 429 on 4 November 2026, so no score is claimed. AI Overview data came from the SERP API where present; live Gemini and Bing answers have not been checked yet and are marked as not yet checked in this report. Public information only, no logins. This report is complimentary and confidential to Molsoft. Unverified in this snapshot: PageSpeed score, Gemini and Bing answers, pages not individually audited, sitemap index counts and lastmods, and a Molsoft rating or review count.
