COMPLIMENTARY SEARCH AND AI VISIBILITY REPORT

How buyers find Routific on Google and in AI answers

We checked your website, your Google rankings, and what Google AI says in search results. Here is what we found on 4 November 2026, and the fixes worth making first.

Prepared for
Routific
Vancouver BC, SaaS

Prepared by
xylvar
SEO and AI visibility for growing companies

Date
4 November 2026

1 The short version

A fresh snapshot, 4 November 2026. Public pages only, no logins. No email has been sent about this report yet.

AREA	VERDICT	WHAT IT MEANS
Google website rankings	MIXED	Routific is #1 for delivery route planning software and for food delivery route optimization, both through one blog guide, and #1 for its brand search. It does not appear as a direct result in the summary top 8 or 9 for the other 7 searches in this run.
AI visibility in search	PARTIAL	SERP AI Overviews were returned for 5 of 10 searches. Routific is named in 1 of those 5, the brand search only. Live Gemini and Bing answers have not been checked yet and are marked as not yet checked.
Page structure	STRONG	Every one of the 12 URLs audited has exactly 1 main heading, and each canonical tag points to itself. That is a strength to keep.
Images without descriptions	FIX	664 of 866 images across the 12 audited pages have no alt text. Worst: homepage 85 of 95, about us 71 of 73, smart route optimization 63 of 99.
Business details	WATCH	Schema is missing on how it works and about us. Llms.txt was not found, it returned 404. Other pages have schema, including FAQPage on several money pages.
Speed	NOT MEASURED	PageSpeed Insights returned HTTP 429 on 4 November 2026, so no score is claimed in this report.

Biggest issue: one blog guide carries the wins

Routific wins only where the search matches its blog guide for best route planning software. Broader searches are won by comparison articles, directories, and other software sites, not by Routific product pages. That is the gap to close first, after alt text.

Biggest strength: clean headings and a strong brand search

Every audited page has exactly 1 H1. Routific is #1 for its own name, through the homepage, and named in the SERP AI Overview for brand search. Keep those facts in plain text on the homepage.

2 Where you rank on Google today

Google Canada, Bright Data SERP API, 4 November 2026. Direct-domain results only. Google redirect entries are not named as competitors, because their final destination is hidden in the redirect URL.

SEARCH	ROUTIFIC	WHO IS AHEAD
delivery route planning software	#1, blog guide for best route planning software	None ahead in direct results; route4me.com #2
food delivery route optimization	#1, same blog guide	None ahead in direct results; getstraightaway.com #2
routific	#1, homepage	None ahead; brand search
route planning software for deliveries	Not in top 9	smartroutes.io #1, upperinc.com #2
last mile delivery software	Not in top 9	onro.io #1, eliteextra.com #2
delivery management software	Not in top 9	softwareadvice.co.uk #1, loginextsolutions.com #2
grocery delivery software	Not in top 9	appintent.com #1, jungleworks.com #2
courier delivery software	Not in top 9	capterra.ca #1, zoomcouriersoftware.com #2
route optimization software canada	Not in top 9	track-pod.com #1, salesforce.com #2
fleet route optimization software	Not in top 8	upperinc.com #1, with Routific mentioned inside that article, not as a direct result

The pattern is clear

One strong blog guide carries the exact category searches, but product pages do not yet win broader searches. The route optimization guide page is 6226 words, yet it does not appear as a direct result for route optimization software canada in this run. Link that guide clearly to product pages, and give product pages their own search job.

Method note: first SERP run returned HTTP 502 for route optimization software canada, fleet route optimization software, and routific. All three succeeded on retry the same day, and the retry results are used here. No map pack was returned in the SERP API for any of the 10 searches.

3 What AI says in search results

Google AI Overview data captured through the SERP API, 4 November 2026. Live Gemini and Bing answers have not been checked yet. AI answers change day to day.

Named in SERP AI Overviews

Routific is named in 1 of the 5 SERP AI Overviews returned: routific, the brand search, where it is the subject, described as a route optimization and last-mile delivery management software platform founded in Vancouver, British Columbia in 2012.

Not named in SERP AI Overviews

Delivery route planning software: snippet cites route4me.com, Routific not named. Route planning software for deliveries: snippet cites route4me.com, Routific not named. Delivery management software: snippet cites Descartes Systems Group, Routific not named. Courier delivery software: snippet cites Capterra Canada, Routific not named.

No SERP AI Overview returned

No AI Overview was returned in the SERP API record for last mile delivery software, food delivery route optimization, grocery delivery software, route optimization software canada, or fleet route optimization software in this run. That does not prove a conversational AI tool would give no answer. Those tools have not been checked yet.

Note for the owner: live Gemini, Bing, and Google AI Overview conversational checks were not done in this task, per task instruction, and no conversational AI result is claimed in this report.

4 What is holding the website back

12 URLs audited on 4 November 2026, 22443 words, 866 images, 664 missing alt text.

Images without descriptions - HIGH

664 of 866 images have no alt text. Worst: homepage 85 of 95, about us 71 of 73, smart route optimization 63 of 99, food and beverage 59 of 64, grocery 58 of 66. Alt text helps search and accessibility, and it is the largest single technical gap here.

Missing schema - MEDIUM

How it works and about us have no schema found by the audit tool. Other pages have schema, including FAQPage on pricing, food and beverage, grocery, and courier pages. Add Organization and WebPage schema to the two missing pages.

Titles and descriptions - MEDIUM

Homepage title 72 characters, customer notifications title 66 characters. Short titles: pricing 18, how it works 23, integrations 25. Meta descriptions over 160 characters: homepage 218, smart route optimization 186, grocery 178, courier 170, route planning tools 164. Short meta descriptions: integrations 99, about us 115.

No llms.txt - LOW

A fetch of routific.com/llms.txt returned 404. Add a plain llms.txt describing what Routific does and which pages matter, so AI tools have a clean source to quote.

What is clean

Every audited page has exactly 1 H1, and each canonical tag points to itself. No duplicate page pairs were found in the audited set, unlike some other audits. Keep that structure.

5 How you compare

From SERP direct domain results, 4 November 2026. Google redirect entries are not named as competitors.

Where Routific leads

Delivery route planning software and food delivery route optimization, both through one blog guide, and the brand search through the homepage. Those are real wins, and they show the blog can rank.

Where others lead

Comparison articles lead broader searches: smartroutes.io and upperinc.com for route planning for deliveries, onro.io and eliteextra.com for last mile delivery software, softwareadvice.co.uk for delivery management software, appintent.com for grocery delivery software, capterra.ca for courier delivery software, track-pod.com and salesforce.com for route optimization software canada, upperinc.com for fleet route optimization software.

Reviews and listings

No map pack was returned in the SERP API for any search, so no map position is claimed. No Places rating is claimed. The homepage copy shows 4.9/5 (144 reviews) without naming the review source in the rendered text, so that figure is site copy only, not a verified third party rating in this audit.

6 What to fix first

In the order the fresh data supports. No ranking or AI mention is promised.

1. Fix alt text

Add alt text to the 664 images missing it, starting with homepage, about us, and smart route optimization.

2. Give product pages a search job

Link the winning blog guide clearly to route optimization, route planning tools, and industry pages, so product pages can rank where a blog guide currently does.

3. Add schema to two pages

How it works and about us, where the audit tool found none.

4. Fix titles and descriptions

Trim the homepage and customer notifications titles, lengthen pricing, how it works, and integrations titles, and bring meta descriptions into range.

5. Add llms.txt

A plain description of Routific and its key pages, for AI tools to quote accurately.

6. Close the broader search gap with guides

A short, plain guide for each broader search Routific does not yet win, linked from product pages, so Routific has a page that can rank where a comparison article currently does.

7 What this becomes in 90 days

From fresh data, not a promise.

Days 1 to 30 - Fix the foundations

All quick wins above that do not need new content, plus baseline tracking of the 10 SERP keywords and the SERP AI Overview results, dated 4 November 2026.

Days 31 to 60 - Rebuild for broader searches

Product page rebuilds, schema and llms.txt checks, first two buyer guides.

Days 61 to 90 - Review results

Check whether broader searches have moved, and set next quarter targets. Do not promise a ranking or an AI mention.

What you get every month

AI visibility tracking across the same questions, Google rankings tracking, one to two buyer guides, a technical health check, reviews and listings checks, and a plain-English report with a monthly call.

Want us to fix these, in order?

Start with alt text, schema, and titles, then product pages for broader searches. The full findings above are the starting point, not a sales pitch.

How we did this. We read 12 URLs on 4 November 2026 (titles, headings, word counts, code markup, image descriptions, robots.txt and llms.txt). Google Canada results were collected via Bright Data SERP API on 4 November 2026, market Canada. No map pack was returned in the SERP API for any search. Speed: PageSpeed Insights returned HTTP 429 on 4 November 2026, so no score is claimed. AI Overview data came from the SERP API where present; live Gemini and Bing answers have not been checked yet and are marked as not yet checked in this report. Public information only, no logins. This report is complimentary and confidential to Routific. Unverified in this snapshot: PageSpeed score, Gemini and Bing answers, sitemap entry count, a verified third party review rating, and Routific pricing.
