COMPLIMENTARY SEARCH AND AI VISIBILITY REPORT

How buyers find ThoughtFarmer on Google and in AI answers

We checked your website, your Google Canada rankings, and what Google AI Overview data in search results says. Here is what we found on 4 November 2026, and the fixes worth making first.

Prepared for
ThoughtFarmer
Vancouver BC, SaaS intranet software

Prepared by
xylvar
SEO and AI visibility for growing companies

Date
4 Nov

1 The short version

A fresh snapshot, 4 November 2026. Public pages only, no logins. No email has been sent about this report yet.

AREA	VERDICT	WHAT IT MEANS
Google website rankings	MIXED	ThoughtFarmer is #1 for intranet software for banks, #1 for thoughtfarmer, and #2 for intranet software canada. It does not appear as a direct result in the summary top 7 to 9 for the other 7 searches in this run.
AI visibility in search	PARTIAL	A SERP AI Overview was returned for 1 of 10 searches, and ThoughtFarmer is not named in it. Live Gemini and Bing answers have not been checked yet and are marked as not yet checked.
Page structure	WATCH	11 of 12 audited URLs have exactly 1 main heading. The homepage has 2 headings in the audit tool output, which is the main on-page fix.
Titles and descriptions	WATCH	4 titles are over 60 characters, the longest at 77. All audited meta descriptions are present, 110 to 146 characters.
Images	STRONG	Only 2 of 805 images across the 12 audited URLs are missing alt text.
Business details	WATCH	Organization schema is on every audited page. No FAQPage, Product, or SoftwareApplication schema was reported in the audited set.
Speed	NOT MEASURED	PageSpeed Insights returned HTTP 429 on 4 November 2026, so no score is claimed.

Biggest issue: ThoughtFarmer wins its bank niche, its Canada page, and its brand name, but generic best, employee, internal communications, knowledge management, and mobile searches are won in the summary by comparison, review, and guide sites, not by a vendor page.

Quickest win: Fix the homepage heading duplication and the 4 long titles, then give the generic searches a buyer page that can compete with list articles.

2 Where you rank on Google today

Google Canada, Bright Data SERP API, 4 November 2026. Direct domain results only, except where a redirect title is noted separately.

SEARCH	THOUGHTFARMER	PAGE GOOGLE SHOWS	DIRECT LEADER AHEAD
intranet software canada	#2	/intranet-canada/	Capterra Canada
best intranet software	Not in top 7 direct	None in summary	PeopleManagingPeople
intranet software for banks	#1	/get/bank-intranet-resources/	None ahead
employee intranet software	Not in top 8 direct	None in summary	PeopleManagingPeople
internal communications platform	Not in top 8 direct	None in summary	Workshop
knowledge management software	Not in top 9 direct	None in summary	HubSpot blog
sharepoint alternative intranet	Not in top 8 direct	Title at #4 in a redirect entry	Slite
intranet software for healthcare	Not in top 9 direct	Title at #7 in a redirect entry	Intranet Connections
mobile intranet app	Not in top 9 direct	None in summary	Staffbase

thoughtfarmer	#1	Homepage	None ahead

The pattern is clear: the bank page, the Canada page, and the brand name carry search, while list articles carry the generic searches. A buyer searching generically meets a comparison first, not ThoughtFarmer.

Note on reading this table: many SERP summary rows are Google redirect entries whose final destination is hidden, so competitor names are only given where the summary domain is direct. ThoughtFarmer redirect titles are noted separately and are not counted as direct rankings. The first intranet software canada attempt returned a 502 captcha error and was retried successfully.

3 What AI says in search results

Google AI Overview data captured through the SERP API, 4 November 2026. Live Gemini and Bing answers have not been checked yet. AI answers change day to day.

SERP AI Overviews: 1 of 10, ThoughtFarmer not named

An AI Overview was returned only for internal communications platform. ThoughtFarmer is not named in the overview text seen, which is generic about internal communication platforms helping organizations streamline messaging, reduce information overload, and connect desk and remote workers. No vendor ranking or price is quoted from that overview in this audit.

No SERP AI Overview returned for the other 9 searches

No AI Overview was returned in the SERP API record for intranet software canada, best intranet software, intranet software for banks, employee intranet software, knowledge management software, sharepoint alternative intranet, intranet software for healthcare, mobile intranet app, or thoughtfarmer in this run. That does not prove a conversational AI tool would give no answer. Those tools have not been checked yet.

Live AI checks: not done

Gemini, Bing, and Google AI Overview browser checks are not included in this report. Do not treat the SERP AI Overview count above as a Gemini or Bing result.

An AI strength already in place

ThoughtFarmer has a full llms.txt file that indexes product, industry, comparison, and case study pages for AI systems. Keep the money page facts in plain text, so AI tools can keep quoting them accurately, and update llms.txt when a money page changes.

4 What is holding the website back

12 URLs audited on 4 November 2026, 15049 words, 805 images, 2 missing alt text.

Homepage has 2 headings - HIGH

Every other audited URL has exactly 1 main heading. The homepage has 2 in the audit tool output, the second appearing to be a concatenated audience and hero heading. Give the homepage one clear main heading.

Titles over 60 characters - HIGH

Knowledge management at 77 characters, internal communications at 66, mobile intranet app at 63, and AI intranet features at 61. Start with knowledge management and internal communications, which are money pages.

Generic searches have no winning page - HIGH

Best, employee, internal communications, knowledge management, and mobile searches are won in the summary by list and guide sites. Strengthen the existing comparison content and the buyer pages with a clear heading, a comparison table, and FAQ content, linked from the homepage and product hub.

Thin product hub - MEDIUM

/product/ is 566 words with a 39 character title. Add a useful product introduction, links to each feature and industry page, and a title that matches what buyers search for.

No FAQ or SoftwareApplication schema in the audited set - MEDIUM

Organization schema is on every page, with BreadcrumbList on some pages, but no FAQPage, Product, or SoftwareApplication schema was reported. Check FAQ schema on money and comparison pages, and SoftwareApplication schema on product pages, after individual page checks.

Images without descriptions - LOW

Only 2 of 805 images are missing alt text, 1 of 91 on /intranet-canada/ and 1 of 159 on the knowledge management page. Fix those two to close an already strong record.

Sitemap URL check - LOW

robots.txt lists sitemap_index.xml, while the index fetched for this audit was at sitemap.xml. Confirm both resolve to the same index, and fix the robots entry if they do not. No broken sitemap claim is made in this audit.

What is already working: All audited meta descriptions are present, 110 to 146 characters. Canonical tags are present on all audited URLs, with a mobile viewport present. The site has a full llms.txt file and a robots file that allows general crawlers. The Canada page, bank page, and brand search already rank directly.

5 How you compare

From SERP direct domain results, 4 November 2026. Google redirect entries are not named as competitors, except where the title itself names ThoughtFarmer.

SEARCH AREA	THOUGHTFARMER	DIRECT LEADERS IN THIS RUN
Banks	#1	Intranet Connections support at #2
Canada	#2	Capterra Canada at #1
Brand	#1	LinkedIn Canada at #2
Generic best and employee	Not direct in top 7 to 8	PeopleManagingPeople and G2 Learn
Internal communications	Not direct in top 8	Workshop and PeopleManagingPeople
Knowledge management	Not direct in top 9	HubSpot blog and Bloomfire
Mobile	Not direct in top 9	Staffbase and Simpplr

Your reputation and niche rankings are already strong. The gap is not what buyers think of ThoughtFarmer when they find it. It is that generic buyers meet a list article first.

6 Fixes in order

- Fix the homepage heading duplication, keeping one clear main heading.
- Fix the 4 titles over 60 characters, starting with knowledge management and internal communications.
- Strengthen comparison and buyer pages for generic searches, with a buyer heading, a comparison table, and FAQ content, linked from the homepage and product hub.
- Add FAQPage schema to money and comparison pages, and check SoftwareApplication schema on product pages.
- Add alt text to the 2 images missing it, on /intranet-canada/ and the knowledge management page.
- Strengthen the product hub, with a useful introduction, feature and industry links, and a clear title.

- Confirm the sitemap URL in robots.txt resolves to the same index as sitemap.xml.
- Keep money page facts in plain text and keep llms.txt updated when money pages change.

7 What this becomes in 90 days

Days 1 to 30 - Fix the foundations

Homepage heading, long titles, the 2 missing alt texts, and the sitemap URL check. Baseline tracking of the 10 Google Canada searches and the SERP AI Overview results, dated 4 November 2026.

Days 31 to 60 - Build the answers

Comparison and buyer page rebuilds, FAQ and SoftwareApplication schema checks, product hub rebuild.

Days 61 to 90 - Review results

Check whether the generic best, internal communications, knowledge management, and mobile searches have moved, and set next quarter targets. Do not promise a ranking or an AI mention.

Want the full audit, with the fixes in order?

This snapshot covered the headlines. Our full audit checks technical, on-page and off-page points, ranks every issue by expected impact, and comes with a 30-day action plan, free with any proposal request.

How we did this. We read 12 URLs on 4 November 2026 (titles, headings, word counts, code markup, image descriptions, robots.txt and llms.txt). Google Canada results were collected via Bright Data SERP API on 4 November

2026, market Canada. No map pack was returned in the SERP API for any search. Speed: PageSpeed Insights returned HTTP 429 on 4 November 2026, so no score is claimed. AI Overview data came from the SERP API where present; live Gemini and Bing answers have not been checked yet and are marked as not yet checked in this draft. Public information only, no logins. This report is complimentary and confidential to ThoughtFarmer. Unverified in this snapshot: PageSpeed score, Gemini and Bing answers, Google AI Overview conversational answers, sitemap entry counts, whether sitemap_index.xml resolves to the same index as sitemap.xml, and any Places rating or single verified review count.
