COMPLIMENTARY SEARCH AND AI VISIBILITY REPORT

How people find P3 Hotel Software on Google and in AI answers

We checked your website, your Google rankings, and what Google AI says in search results. Here is what we found on 6 November 2026, and the fixes worth making first.

Prepared for
P3 Hotel Software
Dublin, hotel booking software

Prepared by
xylvar
SEO and AI visibility for growing companies

Date
6 November 2

1 The short version

A fresh snapshot, 6 November 2026. Public pages only, no logins. No email has been sent about this report yet.

AREA	VERDICT	WHAT IT MEANS
Google website rankings	BRAND ONLY	No #1 in any money search. The only direct results are the brand search at #1 and #2, through inner pages, not the homepage. No direct result in the summary top 6 to 9 for any of the 9 money searches.
Google map packs	NO PACK RETURNED	No structured map top 3 was returned for any of the 10 searches, so no map position is claimed for P3 or for any competitor. The only map element in the run was a map image for hotel concierge software.
AI visibility in search	NO OVERVIEW CAPTURED	No AI Overview was returned for any of the 10 searches, so P3 is named in 0 of 0 overviews. Live Gemini and Bing answers have not been checked yet.
Page titles	MOSTLY FINE	11 of 12 audited titles are within 60 characters. Online guest journey at 63 is the one over.
Page structure	WATCH	The homepage has no main heading at all, no schema markup was found on any of the 12 pages, and 141 of 571 images are missing alt text.
Business details	STRONG	Your contact email info@p3hotels.com is verified on the site, the knowledge panel shows 5.0 with 3 reviews, and robots.txt blocks no crawler.
Speed	NOT MEASURED	PageSpeed Insights returned HTTP 429 on 6 November 2026, so no score is claimed in this report.

Biggest strength: people who already know the name find you, and the listing backs it up

The brand search returns your own pages at #1 and #2, and the knowledge panel shows P3 Hotel Software at 5.0 with 3 reviews, with your Dublin address and phone. The site is a real product site, 12,808 words across the 12 audited pages, with a verified contact email and a robots file that blocks nothing.

Biggest issue: the website does not rank for the searches that bring new hotel clients

No direct result appears for hotel booking software ireland, hotel booking engine ireland, hotel reservation software, hotel booking system dublin, hotel software ireland, hotel direct booking software, hotel concierge software, hotel upselling software, or hotel booking engine software. The top spots go to rival vendors such as RoomRaccoon, The Access Group and WeArePlanet, and to directory pages from Capterra and GetApp. There is no dedicated concierge page and no dedicated upselling page, the homepage has no main heading, and no page carries schema markup.

2 Where you rank on Google today

Google Ireland, Bright Data SERP API, 6 November 2026. Direct-domain results only. Google redirect entries are not named as competitors, because their final destination is hidden in the redirect URL.

SEARCH	P3	WHO IS AHEAD
hotel booking software ireland	Not in top 9	capterra.ie #1, roomraccoon.ie #2
hotel booking engine ireland	Not in top 9	trivago.ie #1, roomraccoon.ie #2
hotel reservation software	Not in top 9	thehotelgm.com #1, partner.booking.com #2
hotel booking system dublin	Not in top 9	No direct leader: all 9 summary rows are Google redirect entries
hotel software ireland	Not in top 9	theaccessgroup.com #1, getapp.ie #2
hotel direct booking software	Not in top 9	flightslogic.com #1, roommaster.com #2
hotel concierge software	Not in top 6	hotelkilkenny.ie #1, belvederehoteldublin.com #2
hotel upselling software	Not in top 9	thehotelgm.com #1, news.exploretech.io #2
hotel booking engine software	Not in top 8	weareplanet.com #1, theaccessgroup.com #2
p3 hotel software	#1 and #2, inner pages	No direct result ahead; homepage not in top 10

The brand search points at inner pages, not the homepage

For p3 hotel software, the direct results are the P3 Essential booking engine page at #1 and the new-look Custom booking engine page at #2. The homepage does not appear as a direct result in the brand summary top 10. That is unusual for a company of this size, and worth checking before anything else.

Nine P3-titled results we cannot attribute

The titles "Hotel Booking Engine, Online Check-in, Guest Journey | P3" at #7 for hotel reservation software and #5 for hotel booking engine software, "P3 Hotel Software | Dublin" at #5 and "P3 Hotel Software | Travel Tech" at #6 for hotel software ireland, and seven more P3-titled results in the brand search, appear as Google redirect entries. Their destinations are hidden in the redirect URLs, so they cannot be confirmed as P3 pages from this data, and they are not counted as rankings. Do not read them as a win or a loss.

Two searches return the wrong kind of result

Hotel booking engine ireland is led by trivago.ie, a hotel price comparison site, not a booking engine vendor. Hotel concierge software returns individual hotels, Hotel Kilkenny and Belvedere Hotel Dublin, rather than concierge software vendors. Both searches are still winnable, but the pages that win them will need to match what the search is actually asking for.

Method note: the hotel software ireland search first returned HTTP 502 with no results on 6 November 2026, then 502 again on the first retry, and succeeded on a second retry the same day. Second-retry results are used. The other 9 searches returned ok on the first run. Summary top counts are 6, 8, 9 or 10 per search, because that is how many organic rows the SERP summary returned.

3 What AI says in search results

Google AI Overview data captured through the SERP API, 6 November 2026. Live Gemini and Bing answers have not been checked yet. AI answers change day to day.

Named in 0 of the 0 overviews returned

No AI Overview was returned for any of the 10 searches in this run. That means there was no overview in the captured data for P3 to be named in, and no overview naming a competitor either. It is a capture result, not proof that no overview exists for these searches at other times.

What that does not prove

Absence in the SERP API does not prove a conversational AI tool would give no answer. Live Gemini, Bing, and Google AI Overview conversational checks were not done in this task, and no conversational AI result is claimed in this report.

Your llms.txt is missing, and no page carries schema markup

llms.txt returns HTTP 404, so there is no clean source file for AI tools to quote. No schema.org markup was found on any of the 12 audited pages, so there is no Organization, SoftwareApplication, FAQPage or Service markup for an AI tool to read either. Your robots.txt is open, which is good, but the two missing pieces above are the cheapest AI visibility steps in this report.

Note for the owner: live Gemini, Bing, and Google AI Overview conversational checks were not done in this task, per task instruction, and no conversational AI result is claimed in this report.

4 What is holding the website back

12 URLs audited on 6 November 2026, 12,808 words, 571 images, 141 missing alt text.

Money searches show no P3 page - HIGH

No direct result for any of the 9 money searches. The product pages exist, P3 Custom and P3 Essential booking engines, hotel booking engines, booking experience, online check-in, online guest journey, loyalty software, metasearch, vouchers, and the Oracle OPERA booking engine, with real content, 608 to 1,797 words each, but none of them is the ranked answer for its own search. The gap is authority and visibility, not missing pages, except for concierge and upselling, where no dedicated page exists at all.

The homepage has no main heading - HIGH

The homepage has 0 H1 tags, confirmed by a direct fetch of the page on 6 November 2026. Every other audited page has exactly 1. Give the homepage one clear main heading that says what the company is and who it serves.

No schema markup on any page - HIGH

No schema.org markup was found on any of the 12 audited pages, confirmed by a direct fetch of the homepage. Add Organization and SoftwareApplication markup first, then FAQPage markup on the pages that answer real buyer questions.

No concierge page and no upselling page - MEDIUM

The sitemap lists no dedicated concierge page, and no dedicated upselling page. The only upsell URL is a blog article about a gift voucher platform and Nor1 upsell integration. Both searches are won by other sites with dedicated pages or listicles.

Alt text gaps - MEDIUM

141 of 571 images are missing alt text. The worst pages are hotel booking engines at 29 of 53, the homepage at 22 of 77, P3 Custom at 14 of 55, P3 Essential at 14 of 38, and online guest journey at 13 of 52. Every audited page has at least 7 images missing alt text.

Sitemap duplicates and a stray copy page - LOW

The sitemap lists 154 URLs but only 151 are unique: /about, a German blog article, and /de/ueber-p3 each appear twice, and a stray /about-COPY page is listed. The sitemap also carries no lastmod dates at all. Clean the duplicates, remove the copy page, and add lastmod dates so search engines can see what changed.

One title over, one meta short - LOW

The online guest journey title is 63 characters, over the usual 60. The hotel booking engines meta is 118 characters, just under the usual 120 to 160 range. The other 11 titles and 11 metas are in range.

What is clean

11 of 12 titles are within 60 characters and 11 of 12 metas are in the 120 to 160 range. Every canonical tag points to its own live URL. The robots file blocks no crawler. Your contact email info@p3hotels.com is verified on the site, on the homepage and the contact page.

5 How you compare

From SERP direct domain results and listings, 6 November 2026. Google redirect entries are not named as competitors.

Where P3 leads

No direct organic #1 in this run. In the brand search, your own pages are #1 and #2. The knowledge panel shows P3 Hotel Software at 5.0 with 3 reviews, with your Dublin address and phone.

Where others lead

RoomRaccoon leads the direct results for hotel booking software ireland and hotel booking engine ireland. The Access Group leads hotel software ireland and is #2 for hotel booking engine software. WeArePlanet leads hotel booking engine software. The Hotel GM leads the hotel reservation software and hotel upselling software listicles. Capterra and GetApp directory pages take the #1 and #2 spots for hotel booking software ireland and hotel software ireland.

Reviews and listings

Knowledge panel, brand search only: P3 Hotel Software 5.0 with 3 reviews, address Tower 4, Fumbally Court, Dublin 8, phone (01) 453 5770. That is SERP knowledge data, not a Places rating, and no Places API rating was returned in this run, so no Places rating is claimed. No structured map pack was returned for any of the 10 searches, so no map top 3 position is claimed for P3 or for any competitor.

6 What to fix first

In the order the fresh data supports. No ranking or AI mention is promised.

1. Give the homepage one main heading

Add a single H1 to the homepage that says the company name, the product, and Dublin, and keep every other page at exactly one H1. This is the clearest on-page gap in the audit.

2. Add schema markup to every page

Start with Organization and SoftwareApplication on the homepage and product pages, then FAQPage markup where the pages already answer buyer questions. No page has any schema today.

3. Add alt text to the 141 images

Start with hotel booking engines at 29 of 53 and the homepage at 22 of 77. This needs no new content, only descriptions of the images already on the pages.

4. Build a concierge page and an upselling page

Two of the money searches have no page to rank at all. Build one dedicated page for each, with the exact search phrase in the title, the first heading, and the opening paragraph.

5. Clean the sitemap

Remove the three duplicated URLs and the /about-COPY page, and add lastmod dates to every entry so search engines can see what changed and when.

6. Add an llms.txt file

Write a short llms.txt that describes the company, its products, and its pages, so AI tools have a clean source to quote. Your robots file already allows all crawlers, so nothing else blocks them.

7. Aim the product pages at their searches

The product pages are real pages with real content, but none ranks for its own search. Add the exact search phrase to the first heading and opening paragraph of each product page, and build supporting guides that link back to them.

7 What this becomes in 90 days

From fresh data, not a promise.

Days 1 to 30 - Fix the foundations

All quick wins above that do not need new content, plus baseline tracking of the 10 SERP keywords and the SERP AI Overview results, dated 6 November 2026.

Days 31 to 60 - Rebuild the product pages

The concierge and upselling pages, the title and meta fixes, and the first buyer guide for the searches where no direct result appears yet.

Days 61 to 90 - Review results

Check whether the money searches, map packs, and AI overviews have moved, and set next quarter targets. Do not promise a ranking or an AI mention.

What you get every month

AI visibility tracking across the same questions, Google rankings tracking, one to two buyer guides, a technical health check, reviews and listings checks, and a plain-English report with a monthly call.

Want us to fix these, in order?

Start with the homepage heading, the schema markup, and the alt text, then the concierge and upselling pages, then the sitemap and llms.txt, then the product page targeting, then the supporting guides. The full findings above are the starting point, not a sales pitch.

Talk through the fixes

Or write to us: **info@xylvar.top** - We reply within 2 business days.

How we did this. We read 12 URLs on 6 November 2026 (titles, headings, word counts, code markup, image descriptions, robots.txt and llms.txt). Google Ireland results were collected via Bright Data SERP API on 6 November 2026, market Ireland. The hotel software ireland search first returned HTTP 502 with no results, then 502 again on the first retry, and succeeded on a second retry the same day; the other 9 searches returned ok on the first run. No structured map pack was returned for any of the 10 searches, so no map top 3 position is claimed. The brand search returned a knowledge panel for P3 Hotel Software at 5.0 with 3 reviews. Speed: PageSpeed Insights returned HTTP 429 on 6 November 2026, so no score is claimed. No AI Overview was returned for any of the 10 searches, and live Gemini and Bing answers have not been checked yet and are marked as not yet checked in this report. Public information only, no logins. This report is complimentary and confidential to P3 Hotel Software. Unverified in this snapshot: PageSpeed score, Gemini and Bing answers, a Places rating, a single verified review count, staff count, and P3 Hotel Software pricing.
