COMPLIMENTARY SEARCH AND AI VISIBILITY REPORT

How landlords and tenants find Orca Realty on Google and in AI answers

We checked your website, your Google rankings in Canada, and what Google AI Overviews say in search results. Here is what we found on 4 November 2026, and the fixes worth making first.

Prepared for
Orca Realty
Burnaby, property management

Prepared by
xylvar
SEO and AI visibility for growing companies

Date
4 November

1 The short version

A fresh snapshot, 4 November 2026. Public pages only, no logins. No email has been sent about this report yet.

AREA	VERDICT	WHAT IT MEANS
Google website rankings	PARTIAL	Orca is #1 for its brand search and #1 for property management services burnaby, but shows no direct result in the summary top 8 or 9 for the other 8 Google Canada searches in this run.
Local map presence	PARTIAL	Orca is in the map top 3 for only 1 of 9 searches with a map pack: #3 for tenant placement services burnaby, 4.5 with 232 reviews in SERP map data.
AI visibility in search	NOT RETURNED	No SERP AI Overview key was returned for any of the 10 searches in this run. Live Gemini and Bing answers have not been checked yet and are marked as not yet checked.
Page structure	STRONG	All 12 audited pages have exactly 1 main heading.
Image descriptions	FIX	41 of 139 images on the 12 audited pages have no alt text, worst on our-team at 36 of 74.
Speed	NOT MEASURED	PageSpeed Insights returned HTTP 429 on 4 November 2026. No score is claimed in this report.

Biggest issue: Orca owns its brand search and one Burnaby services search, but landlords searching the broader Burnaby and Vancouver terms do not see orcarealty.ca in the top results, and do not see it in most map packs either. The Burnaby page that does rank shows the template works. The other money pages need the same search job.

This report is complimentary and confidential to Orca Realty. It is based on public pages and search results on 4 November 2026, not on any private data.

2 Where you rank on Google today

Google Canada, Bright Data SERP API, 4 November 2026. Direct-domain results only. Google redirect entries are not counted as direct rankings, because their final destination is hidden in the redirect URL.

SEARCH	ORCA RESULT	WHO LEADS INSTEAD
property management burnaby	Not in summary top 8	Birds Nest Properties #1, PAMA directory #2
property management vancouver	Not in summary top 9	Birds Nest Properties #1, Ascent #2
burnaby property management companies	Not in summary top 9	PAMA directory #1, Birds Nest Properties #2
rental property management burnaby	Not in summary top 9	PAMA directory #1, Birds Nest Properties #2
property management companies vancouver	Not in summary top 9	Bodewell #1, PAMA directory #2
landlord property management burnaby	Not in summary top 9	Reside Management #1, PAMA directory #2
commercial property management vancouver	Not in summary top 8	Taurus Commercial #1, Indeed jobs page #2
property management services burnaby	**#1 through /burnaby-property-management/**	VADA #2
tenant placement services burnaby	Not in summary top 9	Greater Vancouver Tenant & Property Management #1
orca realty	**#1 through the homepage**	Instagram @orca_realty #2

What this means

Two #1s is a real base, and both are the searches closest to Orca itself. The gap is every broader landlord search. A landlord typing property management burnaby or property management vancouver in this run meets Birds Nest Properties, the PAMA directory and Ascent first, not Orca. The Burnaby page already proves Orca can win a services search. The same page-level work, a clear title, a full description and a page that answers the search, is what the Vancouver and landlord pages are missing in search results.

Two searches in this run needed a retry: commercial property management vancouver and orca realty both returned a 502 on the first run and succeeded on retry the same day. Retry results are used.

3 Local map presence

SERP map pack data, 4 November 2026. Ratings and review counts below are SERP map figures, not a Places API fetch.

The one map win

Orca Realty Inc. Burnaby is #3 in the map pack for tenant placement services burnaby, at 4.5 with 232 reviews in SERP map data, at 3997 Henning Dr Unit 201. That is the only map top 3 in this run.

The gap

Map packs were returned for 9 of 10 searches, and Orca is in none of the other 8 top 3s. The packs are led again and again by the same names: Vada Property Management, Greater Vancouver Tenant & Property Management, Birds Nest Properties and VMH Properties. For property management burnaby the pack is Vada 4.6 with 369 reviews, Greater Vancouver Tenant & Property Management 4.6 with 894, and Casado Property Management 5.0 with 73. Orca is not in it, even though its Burnaby page ranks #1 organically for a closely related search. Organic and map visibility are not moving together here, and the map side is the weaker of the two.

The brand search returned no map pack in this run, so no brand map position is claimed.

4 AI visibility in search

SERP AI Overview data only, 4 November 2026. Live conversational AI checks were not done in this audit.

No SERP AI Overview returned for any of the 10 searches

No ai_overview key was returned in any of the 10 SERP records in this run, so Orca is named in 0 SERP AI Overviews here. That is a statement about this SERP run, not a claim that a conversational AI tool would give no answer about Orca. Live Google AI Overview, Gemini and Bing answers have not been checked yet and are marked as not yet checked, so no conversational AI result is claimed in this report.

Why it still matters

When AI Overviews do appear for property management searches, they tend to name the firms Google already trusts for that topic. Orca has one strong trust signal already, the landlords FAQ page with FAQPage schema, and a homepage RealEstateAgent schema. The rest of the money pages carry no schema in the fetched markup, which gives AI answers less structured material to quote. Adding the same structured markup to the Burnaby, services and commercial pages is the cheapest AI-visibility fix in this report.

5 Your pages, page by page

Direct fetch, 4 November 2026. 12 URLs, 11,605 words, 139 images, 41 missing alt text.

PAGE	TITLE	META	H1S	WORDS	IMAGES MISSING ALT
Homepage	61	125	1	2,201	3 of 20
/services/	53	125	1	433	0 of 5
/property-management-services/	47	164	1	1,297	1 of 8
/burnaby-property-management/	51	164	1	2,056	0 of 7
/landlords/	54	110	1	1,136	0 of 6
/looking-for-a-tenant/	64	133	1	560	0 of 3
/commercial-property-management/	49	123	1	1,103	0 of 2
/rent-your-home/	38	0, none	1	640	0 of 3
/lease-only-service/	18	136	1	495	0 of 2
/our-team/	70	142	1	525	36 of 74
/about/	8	134	1	792	1 of 7
/areas-we-serve/	58	100	1	367	0 of 2

Headings are clean, titles and descriptions are not

Every audited page has exactly 1 main heading, which is the right structure. The fixes are smaller and specific: rent-your-home has no meta description at all, so Google writes its own

snippet for that page. The about title is 8 characters, too short to say anything in search. The lease-only title is 18 characters. The our-team title is 70 characters, over the usual display length. The property-management-services and Burnaby meta descriptions are 164 characters, just over 160. None of these alone explains a missing ranking, but together they weaken the pages that most need to win landlord searches.

Images and schema

Alt text is a team-page problem first: 36 of the 41 missing alt texts sit on our-team, 36 of 74 images there. The rest of the site is nearly clean. Schema is the opposite pattern: only the homepage (RealEstateAgent) and landlords (FAQPage) carry schema in this set. The other 10 audited pages show none found in the fetched markup, including the Burnaby page that already ranks #1. That page wins without schema, which means schema is an opportunity, not an excuse.

Thin pages

Services at 433 words and areas-we-serve at 367 words are thin for pages that should answer a landlord question. The Burnaby page, by contrast, is 2,056 words and ranks #1 for its services search. Length is not the ranking itself, but the Burnaby page shows what a full answer looks like on this site, and the thin pages do not match it.

6 Technical checks

Fetched 4 November 2026.

Robots and sitemaps, in order

Robots.txt allows all crawlers and lists the sitemap index. The index lists three child sitemaps: pages with 51 URLs counted, blogs with 116 counted, and listings with 106 counted. Counts are counts of location lines in the fetched files.

llms.txt is not present

Fetching /llms.txt returns the site 404 page, so llms.txt is recorded as not present. AI crawlers that look for that file find nothing to read about Orca.

Speed not measured

Google PageSpeed Insights returned HTTP 429, quota exceeded, on 4 November 2026 and was not retried. No score, loading time or layout-shift figure is claimed in this report, and no proxy timing is quoted as page speed.

7 The 90-day fix list

In priority order. No ranking is guaranteed, and no price is quoted in this report.

1. Give the Vancouver and landlord pages the Burnaby treatment

Use the Burnaby page as the template: a search-led title, a full description under 160 characters, and a page that answers the landlord question in full. Start with property management vancouver and landlord property management burnaby, the two searches where Orca is furthest from the leaders.

2. Fix the five title and description gaps

Write a meta description for rent-your-home. Rewrite the about title from 8 characters and the lease-only title from 18 characters so each says what the page is. Trim the our-team title from 70 characters and the two 164-character descriptions to under 160.

3. Add alt text on our-team, and schema on the money pages

36 missing alt texts on our-team is one afternoon of work. Add RealEstateAgent and FAQ markup to the Burnaby, services, commercial and landlords-adjacent pages so AI answers have structured material to quote.

4. Close the map gap

Orca is in 1 of 9 map packs. The map leaders repeat across searches, so the work is the listing itself and the pages behind it, not a new page per search. Keep the Burnaby address consistent everywhere it appears, and make sure the tenant placement win is not the only map result.

5. Add llms.txt and thicken the thin pages

A short llms.txt that describes Orca, its services and its areas gives AI crawlers something to read. Expand services and areas-we-serve beyond 433 and 367 words so they answer the questions landlords actually ask.
