COMPLIMENTARY SEARCH AND AI VISIBILITY REPORT

How Formby and Southport customers find Tower Heating on Google and in AI answers

We checked your website, your Google rankings, and what Google AI says in search results. Here is what we found on 4 November 2026, and the fixes worth making first.

Prepared for
Tower Heating
Formby, heating and plumbing engineers

Prepared by
xylvar
SEO and AI visibility

Date
4 November 2026

1 The short version

A fresh snapshot, 4 November 2026. Public pages only, no logins. No email has been sent about this report yet.

AREA	VERDICT	WHAT IT MEANS
Google website rankings	SPLIT	Tower Heating is #1 for boiler installation formby, boiler servicing formby, boiler repair formby, and heating engineers formby. It does not appear as a direct result in the summary top 9 or 10 for either Southport boiler search, for plumbers formby, emergency plumber southport, or heat pumps southport.
Brand search	FIX	For tower heating itself, no direct towerheating.com result appears in the summary top 9. The #1 direct domain is towerheatingservices.co.uk, a different business, and #2 is the Tower Heating Formby Facebook page.
Map packs	SPLIT	Tower Heating is #1 in the map pack for boiler installation formby and boiler servicing formby, and #2 for boiler repair formby and heating engineers formby. It is in none of the top 3 map packs for the Southport or generic plumbing searches in this run.
AI visibility in search	THIN	A SERP AI Overview was returned for only 1 of 10 searches, emergency plumber southport, and Tower Heating is not named in it. Live Gemini and Bing answers have not been checked yet.
Page structure	GOOD	All 12 audited pages have exactly 1 main heading. Headings are not the problem in this audit.
Titles and schema	FIX	Heat pumps title is 10 characters, air conditioning 16, Formby boiler installation 26, Southport boiler installation 29. Schema is missing on 7 of 12 audited pages, including every area page audited.

Images	FIX	240 of 400 images across the 12 audited pages have no alt text, worst on the homepage at 34 of 46.
Reviews	STRONG	SERP knowledge panel: 5.0 with 742 reviews. Homepage schema: 5.0 with 683 reviews. The two counts differ, so they are reported separately, not merged.
Speed	NOT MEASURED	PageSpeed Insights returned HTTP 429 on 4 November 2026. No score is claimed in this report.

Biggest issue: Formby wins, Southport does not

The homepage wins every Formby boiler and heating engineer search in this run, but the Southport area page does not appear for either Southport boiler search, and the heat pumps page does not appear for heat pumps southport. The gap is area and service page strength, not brand awareness in Formby.

2 Where you rank on Google today

Google UK, Bright Data SERP API, 4 November 2026. Direct-domain results only. Google redirect entries are not named as competitors, because their final destination is hidden in the redirect URL. Two searches first returned HTTP 502 and succeeded on retry the same day.

SEARCH	TOWER HEATING	WHO IS AHEAD
tower heating	Not in top 9	towerheatingservices.co.uk #1, a different business; Facebook page #2
boiler installation formby	#1, homepage	None ahead; #2 is also towerheating.com
boiler servicing formby	#1, homepage	None ahead; trustatrader.com #2
boiler repair formby	#1, our history page	None ahead; trustatrader.com #2
heating engineers formby	#1, homepage	None ahead; trustatrader.com #2
boiler installation southport	Not in top 10	southport-heating.co.uk #1, checkatrade.com #2
boiler service southport	Not in top 10	apgdomesticservices.co.uk #1, halsallheating.co.uk #2
plumbers formby	Not in top 9	plumbersinformby.co.uk #1, checkatrade.com #2
emergency plumber southport	Not in top 9	checkatrade.com #1, whitfieldheatingandplumbing.co.uk #2
heat pumps southport	Not in top 9	renewableenergyhub.co.uk #2, after a Google redirect entry at #1

Brand search warning

For tower heating, the #1 direct result is towerheatingservices.co.uk, not towerheating.com. Ranks 5 to 7 are Google redirect entries, whose destinations are hidden, so they are not counted as direct towerheating.com rankings. Do not claim a homepage #1 for the brand search from this run.

Map packs

A map pack was returned for 8 of 10 searches. Tower Heating is #1 in the pack for boiler installation formby and boiler servicing formby, #2 for boiler repair formby and heating engineers formby, and in none of the top 3 packs for boiler installation southport, boiler service southport, plumbers formby, or emergency plumber southport. No map pack was returned for tower heating or heat pumps southport, so no map position is claimed for those two. Map ratings and review counts are SERP map pack data, not a Places API rating.

Reviews, with sources kept separate

SERP knowledge panel, 4 November 2026: Tower Heating, gas installation service in Formby, rating 5, 742 reviews, 47, 47A Liverpool Rd, Formby, Liverpool L37 6BT, phone 01704 834363. Homepage schema, same day: rating 5.0, 683 reviews. The counts differ, so this report does not merge them into one figure.

3 What AI says in search results

Google AI Overview data captured through the SERP API, 4 November 2026. Live Gemini and Bing answers have not been checked yet. AI answers change day to day.

Named in a SERP AI Overview: 0 of 1

Emergency plumber southport is the only search in this run with an AI Overview returned in the SERP API record. Tower Heating is not named in the overview text seen. The visible snippet names Just Boilers and Plumbing Ltd and Plumber Southport, with general emergency advice.

No SERP AI Overview returned: 9 of 10

Tower heating, boiler installation formby, boiler servicing formby, boiler repair formby, heating engineers formby, boiler installation southport, boiler service southport, plumbers formby, and heat pumps southport. That does not prove a conversational AI tool would give no answer. Those tools have not been checked yet.

AI answers change day to day. These are SERP AI Overview results on 4 November 2026, not verified company facts, and not a promise of future mentions.

4 What is holding the website back

12 URLs audited on 4 November 2026, 10,093 words in total, 400 images in total, 240 missing alt text in total.

Southport pages do not rank - HIGH

The Southport boiler installation area page is 723 words, has a 29 character title, and no schema found by the audit tool, and it does not appear for either Southport boiler search in this run. The main boiler installation service page is 792 words and also does not appear for Southport searches.

Short titles on money pages - HIGH

Heat pumps title is 10 characters, air conditioning 16, Formby boiler installation 26, Southport boiler installation 29. No audited title is over 60 characters. Short titles give Google little to match against a service and area search.

Schema missing on 7 of 12 pages - HIGH

No schema found by the audit tool on plumbing services, heat pumps, radiator services, Formby boiler installation, Southport boiler installation, reviews, and get in touch. The homepage, boiler installation, boiler servicing, repairs, and air conditioning pages do carry schema, including LocalBusiness and AggregateRating types.

Images without descriptions - MEDIUM

240 of 400 images in the audited set have no alt text, worst on the homepage at 34 of 46, then boiler servicing at 23 of 42, repairs at 22 of 39, and get in touch at 22 of 28.

Meta descriptions just over the line - LOW

Heat pumps 165 characters, air conditioning 165, Formby boiler installation 161. All other audited meta descriptions are 151 to 158 characters.

Boiler repair search lands on a history page - MEDIUM

The #1 result for boiler repair formby in this run is the about us our history page, not the repairs service page at /services/repairs. The repairs page exists and is 750 words, but it is not the page Google shows for that search.

Sitemap redirect pages - WATCH

The sitemap lists 88 URLs, including 4 redirect pages: redirect-phil, redirect-keith, redirect-steve, and redirect-ste. They are listed, not checked live, and no removal is recommended on the sitemap list alone.

5 How you compare

From SERP direct domain results, 4 November 2026. Google redirect entries are not named as competitors.

Formby rivals are directories and local specialists

TrustATrader appears at #2 for boiler servicing formby, boiler repair formby, and heating engineers formby. Plumbers in Formby leads plumbers formby. Tower Heating beats them on the four Formby boiler and heating engineer searches in this run, but not on the generic plumbing search.

Southport is a different market

Southport searches are led by Southport firms: A. Green and Son for boiler installation southport, APG Domestic Services and Halsall Heating for boiler service southport, and Gregs heating and plumbing in both Southport map packs. A Formby homepage does not carry a Southport search on its own.

Reviews are the edge to protect

A 5.0 rating with hundreds of reviews, on both the SERP knowledge panel and the homepage schema, is stronger than most map pack rivals in this run, including Gregs at 4.9 with 122 and A R Johnson at 4.7 with 94. The one fix is the count mismatch, 742 in the panel against 683 in schema, so the site and the panel tell the same story.

6 Fixes in order

No ranking or AI mention is promised. These are the fixes the fresh data supports, in order.

- Give the Southport boiler installation area page a search job: a title naming the service and area, LocalBusiness schema, and clear links from the homepage and the main boiler installation service page.
- Strengthen brand signals so towerheating.com, not towerheatingservices.co.uk, is the direct result for tower heating, and check that the Facebook page and knowledge panel point to towerheating.com.
- Rewrite short titles on money pages, starting with heat pumps, air conditioning, Formby boiler installation, and Southport boiler installation.
- Add schema to the 7 audited pages where none was found, starting with LocalBusiness on service and area pages.
- Add alt text to the 240 images missing it, starting with homepage, boiler servicing, repairs, and get in touch.
- Trim meta descriptions over 160 characters on heat pumps, air conditioning, and Formby boiler installation.
- Reconcile the review counts, 683 in homepage schema against 742 in the SERP knowledge panel, and update the schema count to the current figure.
- Link the repairs service page prominently from the history page, so the boiler repair search can land on a repairs page.
- Add an llms.txt file describing what Tower Heating does and which pages matter, so AI tools have a clean source to quote.
- Check the 4 sitemap redirect pages live before deciding whether any should be removed or noindexed.

7 What this becomes in 90 days

- Days 1 to 30: fixes 1 to 6 above, plus baseline tracking of the 10 SERP keywords and the SERP AI Overview results, dated 4 November 2026.
- Days 31 to 60: Southport area page rebuild, heat pumps page rebuild, schema checks on service and area pages, review count reconciliation.

- Days 61 to 90: review results, check whether the Southport, plumbing, and heat pump searches have moved, and set next quarter targets.

How we did this. We read 12 URLs on towerheating.com on 4 November 2026 (titles, headings, word counts, code markup, image descriptions, robots.txt, sitemap, and llms.txt check). Google UK results were collected via Bright Data SERP API on 4 November 2026, market UK. Two searches first returned HTTP 502 and succeeded on retry the same day. Map pack data came from the SERP API where returned. Speed: PageSpeed Insights returned HTTP 429 on 4 November 2026, so no score is claimed. AI Overview data came from the SERP API where present; live Gemini and Bing answers have not been checked yet and are marked as not yet checked in this report. Public information only, no logins. This report is complimentary and confidential to Tower Heating. Unverified in this snapshot: PageSpeed score, Gemini and Bing answers, a Places API rating, a single merged review count, and team size as supplied in the brief.
