COMPLIMENTARY SEARCH AND AI VISIBILITY REPORT

How people find Wicket on Google and in AI answers

We checked your website, your Google rankings, and what Google AI says in search results. Here is what we found on 6 November 2026, and the fixes worth making first.

Prepared for
Wicket
Ottawa, member data platform for associations

Prepared by
xylvar
SEO and AI visibility for growing companies

Date
6 November 2026

1 The short version

A fresh snapshot, 6 November 2026. Public pages only, no logins. No email has been sent about this report yet.

AREA	VERDICT	WHAT IT MEANS
Google website rankings	WEAK	1 direct win in the summary top 8 or 9: #1 for your own name, wicket, through the homepage. No direct result for the other 9 searches.
Google map packs	NOT SHOWN	No structured map pack was returned in any of the 10 SERP records, so no map position is claimed.
AI visibility in search	NOT NAMED	3 SERP AI Overviews were returned, and Wicket is named in 0 of 3. Live Gemini and Bing answers have not been checked yet.
Page titles	WATCH	8 of 12 audited titles are over 60 characters, and the other 4 are under 30. None sits in the 50 to 60 range.
Page structure	WATCH	All 12 pages have exactly 1 main heading, but 4 pages have no meta description at all, and 230 of 924 images are missing alt text.
Business details	WEAK	The same Yoast schema template sits on every page, with no SoftwareApplication or Organization type. llms.txt is absent, and no public email was found on any audited page.
Speed	NOT MEASURED	PageSpeed Insights returned HTTP 429 on 6 November 2026, so no score is claimed in this report.

Biggest strength: your own name finds you

Your homepage is #1 for wicket on Google Canada. That is the one direct win in this run, and it proves the site itself is indexed and reachable.

Biggest issue: the money searches do not show you at all

No direct wicket.io result appears for any of the 9 money searches, from membership management software canada to member portal software. The searches are led by Gestisoft, Join It, Member365, WildApricot, Members Village and others, not by Wicket.

2 Where you rank on Google today

Google Canada, Bright Data SERP API, 6 November 2026. Direct-domain results only. Google redirect entries are not named as competitors, because their final destination is hidden in the redirect URL.

SEARCH	WICKET	WHO IS AHEAD
membership management software canada	Not in top 9	gestisoft.com #1, joinit.com #2
member management software	Not in top 9	member365.com #1, group.app #2
association management software canada	Not in top 9	membersvillage.com #1, capterra.ca #2
membership software for associations	Not in top 9	joinit.com #1, yourmembership.com #2
member database software	Not in top 9	fonteva.com #1, capterra.com #2
association membership software	Not in top 9	wildapricot.com #1, memberclicks.com #2
nonprofit membership management software	Not in top 9	member365.com #1, bonterratech.com #2
member portal software	Not in top 9	veryconnect.com #1, neonone.com #2
membership management system	Not in top 9	gestisoft.com #1, member365.com #2
wicket	#1 through the homepage	

	No other direct result ahead; the rest of the top 8 are other meanings of the word wicket, as redirect entries

The brand search is not a clean win

Your homepage is #1 for wicket, but the rest of the brand top 8 is other meanings of the word: Apache Wicket, Wicket Inc., cricket, a pub, an Instagram account, and a facial-authentication product. A searcher who types only "wicket" still has to tell you apart from all of those.

Method note: membership software for associations first returned HTTP 502 with a captcha error and no results on 6 November 2026. It succeeded on retry the same day, and retry results are used. Summary top counts are 8 or 9 per search, because that is how many organic rows the SERP summary returned.

3 What AI says in search results

Google AI Overview data captured through the SERP API, 6 November 2026. Live Gemini and Bing answers have not been checked yet. AI answers change day to day.

3 overviews returned, Wicket named in 0 of 3

A top-level AI Overview key was returned for member management software, membership management system, and wicket. The first links only to Capterra Canada, the second links only to Join It, and the brand overview is a dictionary definition of the word "wicket" from Merriam-Webster, not your company.

No overview for the other 7 searches

No ai_overview key was returned for the other 7 searches, so there is no overview naming Wicket, and none naming a competitor either, in those records. That is a blank in the data, not evidence that AI tools never mention the company.

What that does not prove

Absence in the SERP API does not prove a conversational AI tool would give no answer. Live Gemini, Bing, and Google AI Overview conversational checks were not done in this task, and no conversational AI result is claimed in this report.

Why llms.txt matters here

Your llms.txt is absent, it returns a 404 page. AI tools have no clean, short source from you to quote when an overview does appear, so they quote directories and competitors instead. A short llms.txt that states what Wicket is, who it is for, and where the key pages are would give them something of yours to use.

Note for the owner: live Gemini, Bing, and Google AI Overview conversational checks were not done in this task, per task instruction, and no conversational AI result is claimed in this report.

4 What is holding the website back

12 URLs audited on 6 November 2026, 8,300 words, 924 images, 230 missing alt text.

No direct result for any money search - HIGH

No direct wicket.io result for any of the 9 money searches. The site has strong category pages in Features, Integrations, and How it works, but none of them is the ranked answer for the phrases buyers type. The money pages need the exact search phrase in the title and first heading, plus content that answers the search, before any of these 9 can move.

One canonical tag points to localhost - HIGH

The What is a member data platform page canonical is https://localhost/what-is-a-member-data-platform/, not its live URL. That tells Google the page lives on a local machine, not on wicket.io. Every other audited page canonical points to its own live URL, so this one is a single fix with a real effect.

Titles miss both ways - MEDIUM

8 of 12 titles are over 60 characters, our story longest at 114, and the other 4 are under 30: contact us 19, partners 17, professional services 30, support tutorials 16. None of the 12 sits in the 50 to 60 character range. Rewrite the money-page titles to the search phrase first, then give the short pages a title that says what the page is.

4 pages have no meta description - MEDIUM

Contact us, partners, professional services, and support tutorials all have 0 characters of meta description. The other 8 are 127 to 156 characters. A missing description leaves Google to write the snippet for you, on pages where you most want the wording to be yours.

Alt text - MEDIUM

230 of 924 images are missing alt text. Worst pages: integrations 61 of 139, what is a member data platform 27 of 101, homepage 26 of 101, features 22 of 103, blog 21 of 23.

Missing schema - MEDIUM

The same Yoast template sits on every audited page: BreadcrumbList, EntryPoint, ListItem, PropertyValueSpecification, ReadAction, SearchAction, WebPage, WebSite, with ImageObject added on blog and our story. No Organization, LocalBusiness, SoftwareApplication, Product or FAQPage type was found on any audited page. For a software company, SoftwareApplication schema on the money pages is the missing piece.

Headings - CLEAN

All 12 pages have exactly 1 H1. Keep this standard when the titles and the money pages are rewritten.

Thin pages - LOW

Contact us 236 words, get a free demo 318, support tutorials 350, blog 419, partners 537, homepage 566, how it works 569. The demo page is the one that asks a visitor to book, and it is the second thinnest page in the set.

What is clean

Every audited page except the member data platform page has a canonical tag pointing to its own live URL. Every audited page has a mobile viewport. The page sitemap lists 49 URLs with the index lastmod 2026-10-16, and robots.txt allows general crawlers with a sitemap line present. The homepage entry in the page sitemap carries a lastmod of 2025-08-18, over a year old, so the sitemap dates are worth a refresh.

5 How you compare

From SERP direct domain results, 6 November 2026. Google redirect entries are not named as competitors.

Where Wicket leads

One direct organic win: #1 for wicket through the homepage. No map pack was returned in any SERP record, so there is no map position to compare, and no knowledge panel block was returned in the brand record.

Where others lead

Gestisoft leads membership management software canada and membership management system direct results. Member365 leads member management software and nonprofit membership management software direct results. Members Village leads association management software canada direct results. Join It leads membership software for associations direct results. Fonteva leads member database software direct results. WildApricot leads association membership software direct results. VeryConnect leads member portal software direct results.

Reviews and listings

No rating or review count is claimed in this report. No knowledge panel block was returned in the brand search record, and no Places API rating was returned in this run.

6 What to fix first

In the order the fresh data supports. No ranking or AI mention is promised.

1. Fix the localhost canonical

Change the canonical on /what-is-a-member-data-platform/ from https://localhost/what-is-a-member-data-platform/ to its live URL. One change, and the page stops telling Google it lives on a local machine.

2. Rewrite the money-page titles

Put the exact search phrase in the title and first heading of the Features, Integrations, and How it works pages, starting with membership management software and association management software, and bring the 8 titles over 60 characters down into range.

3. Write the 4 missing meta descriptions

Contact us, partners, professional services, and support tutorials need a description each, 120 to 156 characters, in your own wording.

4. Add a short llms.txt

State what Wicket is, who it is for, and where the key pages are, so AI tools have a source of yours to quote instead of directories and competitors.

5. Add SoftwareApplication schema

Add SoftwareApplication schema to the money pages, and Organization schema sitewide, on top of the Yoast template already present.

6. Fix the alt text on the worst pages

Start with integrations at 61 of 139 missing, then the member data platform page, the homepage, and features. That clears most of the 230 missing.

7 What this becomes in 90 days

From fresh data, not a promise.

Days 1 to 30 - Fix the foundations

All quick wins above that do not need new content, plus baseline tracking of the 10 SERP keywords and the SERP AI Overview results, dated 6 November 2026.

Days 31 to 60 - Rebuild for the money searches

The money-page rebuilds, with the search phrase in the title and first heading, and the first buyer guide for the searches where no direct result appears yet.

Days 61 to 90 - Review results

Check whether the money searches, map packs, and AI overviews have moved, and set next quarter targets. Do not promise a ranking or an AI mention.

What you get every month

AI visibility tracking across the same questions, Google rankings tracking, one to two buyer guides, a technical health check, reviews and listings checks, and a plain-English report with a monthly call.

Want us to fix these, in order?

Start with the localhost canonical, the money-page titles, and the missing meta descriptions, then llms.txt and schema. The full findings above are the starting point, not a sales pitch.

Talk through the fixes

Or write to us: **info@xylvar.top** - We reply within 2 business days.

How we did this. We read 12 URLs on 6 November 2026 (titles, headings, word counts, code markup, image descriptions, robots.txt and llms.txt). Google Canada results were collected via Bright Data SERP API on 6 November 2026, market Canada. Membership software for associations first returned HTTP 502 with a captcha error and no results; it succeeded on retry the same day, and retry results are used. No structured map pack was returned in any of the 10 SERP records, and no knowledge panel block was returned in the brand search record. Speed: PageSpeed Insights returned HTTP 429 on 6 November 2026, so no score is claimed. AI Overview data came from the SERP API where present; a top-level overview was returned for 3 of 10 searches, and live Gemini and Bing answers have not been checked yet and are marked as not yet checked in this report. Public information only, no logins. This report is complimentary and confidential to Wicket. Unverified in this snapshot: PageSpeed score, Gemini and Bing answers, a Places rating, a single verified review rating, staff count, the contact email, and Wicket pricing.
