COMPLIMENTARY SEARCH AND AI VISIBILITY REPORT

How people find Claddagh Medical Centre on Google and in AI answers

We checked your website, your Google rankings, and what Google AI says in search results. Here is what we found on 6 November 2026, and the fixes worth making first.

Prepared for
Claddagh Medical Centre
Galway, GP practice

Prepared by
xylvar
SEO and AI visibility for growing companies

Date
6 November 2026

1 The short version

A fresh snapshot, 6 November 2026. Public pages only, no logins. No email has been sent about this report yet.

AREA	VERDICT	WHAT IT MEANS
Google website rankings	NO DIRECT WIN	No direct result for your site in any of the 10 searches we ran. Your homepage appears only as a Google redirect entry for doctor galway, which this report does not count as a ranking.
Google map packs	NO DATA	No structured map top 3 was returned in any of the 10 SERP records, so no map position is claimed in this run.
AI visibility in search	NAMED ONCE	An AI Overview was returned for 5 of 10 searches, and Claddagh is named in 1 of 5, the overview for your own name. Live Gemini and Bing answers have not been checked yet.
Page titles	WATCH	All 12 audited titles are within 60 characters, but none says Galway, GP, or doctor. Fees is 4 characters, About us is 8, Services is 8.
Page structure	NEEDS WORK	No audited page has a meta description at all, and the homepage has no main heading. No schema was found on any audited page.
Business details	WATCH	No schema was found on any audited page, llms.txt is not present, and your contact email info@claddaghmedicalcentre.com is verified on the homepage and the contact page.
Speed	NOT MEASURED	PageSpeed Insights returned HTTP 429 on 6 November 2026, so no score is claimed in this report.

Biggest strength: Google knows who you are

Your brand search shows a knowledge panel for The Claddagh Medical Centre, a general practitioner in Galway, with your address, phone, and a 3.7 rating with 29 reviews, and the AI Overview for your own name describes the practice and links to your homepage. People who already know the practice find it. That is the one clean win in this run.

Biggest issue: the money searches do not show your site at all

No direct result appears for gp galway, doctor galway, medical centre galway, gp clinic galway, private gp galway, physiotherapy galway, health screening galway, minor surgery galway, or well woman check galway, and no direct result appears for your own name either. The pages that do rank are other practices, directories, and referral pages, not your pages.

2 Where you rank on Google today

Google Ireland, Bright Data SERP API, 6 November 2026. Direct-domain results only. Google redirect entries are not named as competitors, because their final destination is hidden in the redirect URL.

SEARCH	CLADDAGH	WHO IS AHEAD
gp galway	Not in top 10	No direct leader can be named: all 10 rows are Google redirect entries
doctor galway	Not in top 10	No direct leader can be named: all 10 rows are Google redirect entries
medical centre galway	Not in top 10	No direct leader can be named: all 10 rows are Google redirect entries
gp clinic galway	Not in top 10	No direct leader can be named: all 10 rows are Google redirect entries
private gp galway	Not in top 10	No direct leader can be named: all 10 rows are Google redirect entries
physiotherapy galway	Not in top 9	No direct leader can be named: all 9 rows are Google redirect entries
health screening galway	Not in top 10	gpcare.ie #1, galwaydoc.com #2
minor surgery galway	Not in top 10	No direct leader can be named: all 10 rows are Google redirect entries
well woman check galway	Not in top 9	bbc.com #1, nationalgallery.ie #2, non-medical results, not competitors
claddagh medical centre	No direct result in top 9	waze.com #1, facebook.com #2, a map link and a social post, not competitors

Two redirect-only appearances are flagged, not claimed

Your homepage appears as a Google redirect entry at rank 4 for doctor galway, and your health-screening page appears as a Google redirect entry at rank 8 for health screening galway. The links in those rows are Google redirect URLs, so this report does not count them as rankings. They show Google is aware of the pages, but they are not direct wins.

The brand search shows the panel, not your site

Your own name search returns no direct result for claddaghmedicalcentre.com in the top 9. The knowledge panel does show the practice, with its Galway address, phone, and reviews, and the AI Overview for your name links to your homepage. A Dublin practice with a similar name, claddaghsurgery.ie, appears in the brand results; it is a different business, not your practice.

Method note: medical centre galway and health screening galway first returned HTTP 502 with no results on 6 November 2026. Health screening galway succeeded on retry the same day, and medical centre galway succeeded on a second retry the same day; the retry results are used. Summary top counts are 10 per search, except physiotherapy 9, well woman check 9, and the brand search 9, because that is how many organic rows the SERP summary returned.

3 What AI says in search results

Google AI Overview data captured through the SERP API, 6 November 2026. Live Gemini and Bing answers have not been checked yet. AI answers change day to day.

Named in 1 of 5 overviews returned

An AI Overview was returned for 5 of 10 searches. Claddagh is named in 1 of 5: the overview for your own name, which describes the practice as a general practice medical clinic in Galway City and links to your homepage, with your address, phone, and email listed. Claddagh is not named in the overviews for gp galway, doctor galway, physiotherapy galway, or medical centre galway.

No overview for the other 5 searches

No overview key was returned for gp clinic galway, private gp galway, health screening galway, minor surgery galway, or well woman check galway. That is a blank in the data, not evidence that AI tools never mention the practice for those searches.

What that does not prove

Absence in the SERP API does not prove a conversational AI tool would give no answer. Live Gemini, Bing, and Google AI Overview conversational checks were not done in this task, and no conversational AI result is claimed in this report.

Why llms.txt matters here

Your llms.txt returns 404, so it is not present. AI tools have no clean, short source from you to quote when an overview does appear. A short llms.txt describing the practice, its services, and its Galway base would give those tools something accurate to use.

Note for the owner: live Gemini, Bing, and Google AI Overview conversational checks were not done in this task, per task instruction, and no conversational AI result is claimed in this report.

4 What is holding the website back

12 URLs audited on 6 November 2026, 4,233 words, 13 images, 1 missing alt text.

No meta description on any page - HIGH

All 12 audited pages have no meta description at all, so Google writes its own snippet for every page. Writing one description per page, in the usual 120 to 160 character range, is the single widest fix in this report.

The homepage has no main heading - HIGH

11 of 12 audited pages have exactly 1 main heading. The homepage has 0, confirmed by a direct fetch of the homepage on 6 November 2026. The homepage is the page Google shows most, and it has no H1 to read.

Money searches show no direct result - HIGH

No direct result for any of the 9 money searches. The service pages exist, health screening, complete health screen, skin surgery, mens health, and family planning, but none of them is the ranked answer for its own search. The pages need the search phrase in the title and first heading, and more content than the 92 to 481 words they carry now.

Titles say nothing about the work or the place - HIGH

Every audited title is within 60 characters, but none says Galway, GP, or doctor. Fees is 4 characters, About us is 8, Services is 8, Contact Us is 10, The Doctors is 11, Mens Health is 12. Short titles are not the problem here; empty ones are. Give each service page a title that names the service and Galway.

No schema anywhere - MEDIUM

No schema.org markup was found on any of the 12 audited pages by the tool. Add Organization and MedicalBusiness schema, and Service schema to the service pages, so Google and AI tools can read what the practice is and what it does.

Services people search for are not on the pages - MEDIUM

The homepage and the services page contain no mention of physiotherapy and no mention of well woman checks, although the practice offers both. There is no dedicated well woman page in the sitemap, and the skin surgery page is titled "Community Surgery", which does not match its URL topic. Give the services people actually search for their own pages, with titles that match.

Thin pages - LOW

Fees 92 words, mens-health 139, contact 185, services 239, about-us 262, health-screening 273, complete-health-screen 307, occupational-health 329. These are the shortest pages in the set, and several of them are the pages behind the money searches.

What is clean

Only 1 of 13 images is missing alt text. Every audited canonical tag points to the audited URL itself. Every audited page has a mobile viewport. The sitemap lists 28 URLs, and robots.txt allows general crawlers with a sitemap line present. Your contact email info@claddaghmedicalcentre.com is verified on the homepage and the contact page.

5 How you compare

From SERP direct domain results and listings, 6 November 2026. Google redirect entries are not named as competitors.

Where Claddagh leads

No direct organic win in this run. Your brand search shows a knowledge panel for the practice, and the AI Overview for your own name describes the practice and links to your homepage. That is the lead you hold: Google knows the practice by name, even though it does not rank your site for the money searches.

Where others lead

For health screening galway, gpcare.ie is #1 and galwaydoc.com is #2 by direct result. For the other 8 searches, no direct leader can be named from this run, because every organic row in those searches is a Google redirect entry. The well woman search returned non-medical results at the top, a BBC culture article and a National Gallery page, which shows that search has weak medical intent in this run.

Reviews and listings

SERP brand knowledge panel: The Claddagh Medical Centre, rating 3.7 with 29 reviews, The Crescent, Galway, H91 EA37, phone (091) 582 321, open Friday 8 am to 5 pm, Saturday and Sunday closed. The panel lists your site as http, not https, which is worth correcting. No Places API rating was returned in this run, so no Places rating is claimed. No structured map data was returned, so no map position is claimed for any search.

6 What to fix first

In the order the fresh data supports. No ranking or AI mention is promised.

1. Write meta descriptions for all 12 pages

Every audited page is missing one. Start with the homepage, services, health screening, and complete health screen, each naming the service and Galway in 120 to 160 characters.

2. Add a main heading to the homepage and fix the titles

Give the homepage one H1 that says who you are and where you are, then rewrite the service page titles to name the service and Galway, starting with health screening, mens health, and skin surgery.

3. Add schema and llms.txt

Add Organization and MedicalBusiness schema sitewide and Service schema to the service pages. Add a short llms.txt describing the practice, its services, and its Galway base, since AI tools currently have no clean source from the practice to quote.

4. Give the searched services their own pages

Add a dedicated well woman page, and put physiotherapy on the services page and the homepage, since neither mentions it now. Rename the skin surgery page title to match its topic instead of "Community Surgery".

5. Deepen the thin service pages

Expand the service pages from 92 to 329 words with what the service covers, who it is for, and the questions patients ask, starting with the pages behind the money searches.

6. Work on the listing

Keep the listing name, address, and phone exactly matching the website, correct the panel site address from http to https, and build the review base up from the 29 reviews shown in the SERP panel.

7 What this becomes in 90 days

From fresh data, not a promise.

Days 1 to 30 - Fix the foundations

All quick wins above that do not need new content, plus baseline tracking of the 10 SERP keywords and the SERP AI Overview results, dated 6 November 2026.

Days 31 to 60 - Rebuild the service pages

The service page rewrites, the schema and llms.txt work, and the first patient guide for the searches where no direct result appears yet.

Days 61 to 90 - Review results

Check whether the money searches, map packs, and AI overviews have moved, and set next quarter targets. Do not promise a ranking or an AI mention.

What you get every month

AI visibility tracking across the same questions, Google rankings tracking, one to two patient guides, a technical health check, reviews and listings checks, and a plain-English report with a monthly call.

Want us to fix these, in order?

Start with the meta descriptions, the homepage heading, and the titles, then schema and llms.txt, then the service page content. The full findings above are the starting point, not a sales pitch.

Talk through the fixes

Or write to us: **info@xylvar.top** - We reply within 2 business days.

How we did this. We read 12 URLs on 6 November 2026 (titles, headings, word counts, code markup, image descriptions, robots.txt and llms.txt). Google Ireland results were collected via Bright Data SERP API on 6 November 2026, market Ireland. Medical centre galway and health screening galway first returned HTTP 502 with no results; health screening galway succeeded on retry the same day, and medical centre galway succeeded on a second retry the same day, and the retry results are used. No structured map top 3 was returned in any of the 10 SERP records, so no map position is claimed. Speed: PageSpeed Insights returned HTTP 429 on 6 November 2026, so no score is claimed. AI Overview data came from the SERP API where present; an overview was returned for 5 of 10 searches, Claddagh is named in 1 of 5, and live Gemini and Bing answers have not been checked yet and are marked as not yet checked in this report. Public information only, no logins. This report is complimentary and confidential to Claddagh Medical Centre. Unverified in this snapshot: PageSpeed score, Gemini and Bing answers, any map position, a Places rating, a single verified review rating, staff count, and Claddagh Medical Centre pricing.
