1 The short version

A fresh snapshot, 6 November 2026. Public pages only, no logins. No email has been sent about this report yet.

AREA	VERDICT	WHAT IT MEANS
Google website rankings	BRAND ONLY	#1 for your own name, aloha dental austin, through a team page, not the homepage. No direct result in the summary top 8 or 9 for any of the other 9 searches.
Google map packs	MISSING	A structured map top 3 was returned for 7 of 10 searches, and Aloha Dental is in none of them. No map pack was returned for emergency dentist austin, root canal austin, or the brand search.
AI visibility in search	NOT NAMED	One SERP AI Overview was returned, for cosmetic dentist austin, and it names Aloha Dental in 0 of 1. Its references link only to other Austin practices. Live Gemini and Bing answers have not been checked yet.
Page titles	MIXED	4 of 12 audited titles are over 60 characters, and the homepage title is 117 characters. The veneers title is only 21 characters. All 12 meta descriptions are present and in range.
Page structure	WATCH	9 of 12 pages have more than 1 main heading, and 26 of 125 images are missing alt text. Schema is present, but no FAQPage type was found on any audited page, and llms.txt returns 404.
Business details	CHECK	Your SERP knowledge panel shows Aloha Dental, 4.6 with 706 reviews, at 1614 E Riverside Dr. The email published on your site is riverside@aloha-dental.com, not the smile@aloha-dental.com address on our list.
Speed		

NOT MEASURED

PageSpeed Insights returned HTTP 429 on 6 November 2026, so no score is claimed in this report.

Biggest strength: people who know your name find you, and the treatment pages exist

Your brand search is #1, through the Dr. Paulo Mazini team page, and your SERP knowledge panel shows the practice, its Riverside Drive address, phone, and a 4.6 rating with 706 reviews. You have dedicated pages for dental implants, Invisalign, teeth whitening, emergency dentistry, root canals, cosmetic dentistry, and veneers, each with 980 to 1,276 words, and all 12 audited meta descriptions are present and in the 115 to 150 range.

Biggest issue: the money searches do not show you at all

No direct result appears for dentist austin, dental clinic austin, family dentist austin, teeth whitening austin, dental implants austin, invisalign austin, emergency dentist austin, cosmetic dentist austin, or root canal austin. The pages that do rank are other Austin practices, directories, and review sites, not your service pages.

2 Where you rank on Google today

Google USA, Bright Data SERP API, 6 November 2026. Direct-domain results only. Google redirect entries are not named as competitors, because their final destination is hidden in the redirect URL.

SEARCH	ALOHA DENTAL	WHO IS AHEAD
dentist austin	Not in top 8	atxfamilydental.com #1, swishsmiles.com #2
dental clinic austin	Not in top 9	austinpcc.org #1, jeffersondentalclinics.com #2
family dentist austin	Not in top 9	keepaustinsmiling.com #1, forestfamily.com #2
teeth whitening austin	Not in top 9	austindentalspa.com #1, purewhitestudios.com #2
dental implants austin	Not in top 9	deltadental.com #1, dhcs.ca.gov #2
invisalign austin	Not in top 8	tomblynfamilyorthodontics.com #1, 8118dental.com #2
emergency dentist austin	Not in top 9	mydentalsmiles.com #1, oakhillfamilydental.com #2
cosmetic dentist austin	Not in top 9	en.wikipedia.org #1, austintexas.org #2
root canal austin	Not in top 9	endoaustin.com #1, austindentalspa.com #2
aloha dental austin	#1 through the Dr. Paulo Mazini team page	No other direct result ahead; zocdoc.com #2

Two searches gave weak answers for everyone

For dental implants austin, the direct #1 is a dental insurance site and #2 is a California government page, neither a local Austin practice. For cosmetic dentist austin, the direct #1 is the Wikipedia page for Austin, Texas and #2 is a tourism site. Those are failed intent matches in the results themselves, not a fair fight, and they show how little local practice content Google is surfacing for those two searches in this run.

Your brand win is a team page, not the homepage

The brand search puts the Dr. Paulo Mazini page at #1, with your Zocdoc page at #2. The homepage is not a direct result in the brand summary top 10. Ranks 3 to 10 are Google redirect entries, not counted. A team page winning the brand search is a sign the homepage is not carrying the practice name strongly enough.

Method note: dentist austin and dental clinic austin first returned HTTP 502 with an empty body and no results on 6 November 2026; both succeeded on retry the same day, and retry results are used. All other 8 searches returned ok on the first run. Summary top counts are 8, 9 or 10 per search, because that is how many organic rows the SERP summary returned.

3 What AI says in search results

Google AI Overview data captured through the SERP API, 6 November 2026. Live Gemini and Bing answers have not been checked yet. AI answers change day to day.

One overview returned, and it does not name Aloha Dental

An AI Overview was returned for 1 of 10 searches, cosmetic dentist austin. It is a map-style overview naming The Cosmetic Dentists of Austin 4.9 (357), Austin Cosmetic Dentistry 4.9 (304), and Austin Artistic Dental 4.9 (884), with references linking only to austincosmetic.com, austinartisticdental.com, and austindentalspa.com. Aloha Dental is named in 0 of 1 returned overviews. No overview key was returned for the other 9 searches.

What that does not prove

Absence in the SERP API does not prove a conversational AI tool would give no answer. Live Gemini, Bing, and Google AI Overview conversational checks were not done in this task, and no conversational AI result is claimed in this report.

Your llms.txt is missing

llms.txt returns HTTP 404 on your site. That file is the clean, machine-readable summary AI tools can quote, and several practices in this batch already have one. Adding it, with your services, address, phone, and the facts from your service pages, is a low-effort step toward being named in AI answers.

Note for the owner: live Gemini, Bing, and Google AI Overview conversational checks were not done in this task, per task instruction, and no conversational AI result is claimed in this report.

4 What is holding the website back

12 URLs audited on 6 November 2026, 12,201 words, 125 images, 26 missing alt text.

Money searches show no Aloha Dental page - HIGH

No direct result for any of the 9 money searches. The treatment pages exist, implants, Invisalign, whitening, emergency, root canals, cosmetic, and veneers, with real content, but none of them is the ranked answer for its own search. The gap is authority and visibility, not missing pages.

Map packs - HIGH

Aloha Dental is in none of the structured map top 3s for the 7 searches that returned one. The firms that do appear repeat across the packs: ATX Family Dental, Austin City Dental, Austin Emergency Dental, Nuvia Dental Implant Center, Luv Braces, and The Cosmetic Dentists of Austin. Your SERP panel figure is 4.6 with 706 reviews, named here with its source, not as a Places rating. That review base is strong, but it is not turning into map top 3 positions in this run.

Too many main headings - MEDIUM

9 of 12 pages have more than 1 main heading. The homepage has 5, dental implants 6, general and family dentistry, cosmetic dentistry, teeth whitening, and root canals 5 each. Only the dental services hub, our team, and contact pages have exactly 1. Each page should have one main heading that says what the page is about, with section headings below it.

Homepage title is 117 characters - MEDIUM

The homepage title, verified by direct fetch, lists three dentists by name and runs to 117 characters. General and family dentistry is 71, dental implants 64, and our team 63. Shorten the homepage title to one service phrase, the practice name, and Austin. The veneers title is only 21 characters and names no brand; give it the same treatment in the other direction.

Alt text gaps - LOW

26 of 125 images are missing alt text. The homepage is 4 of 26, and every other audited page has exactly 2 images missing alt text, which points at template images rather than page content. Alt text is the cheapest fix in this report.

Thin pages - LOW

Contact is 424 words and the dental services hub is 617. The treatment pages themselves are not thin, at 980 to 1,276 words.

Repeated meta descriptions - LOW

All 12 meta descriptions are present and in the 115 to 150 range, but the homepage, general and family dentistry, and root canals pages all open with the same service list. Give each page its own opening line, and do not start the homepage meta with the single word "Home.".

No FAQPage schema - LOW

Service pages carry Dentist, LocalBusiness, and Service schema, and the homepage carries Organization, but no FAQPage type was found on any of the 12 audited pages. Your service pages already answer common questions in their text; marking those questions up is a straightforward addition.

What is clean

All 12 meta descriptions are present, none over 160 characters. Every audited canonical tag points to its own live URL. The sitemap index lists 5 child sitemaps with 41 page URLs, and robots.txt allows general crawlers with a sitemap line. Dedicated pages exist for every money treatment checked.

5 How you compare

From SERP direct domain results and map packs, 6 November 2026. Google redirect entries are not named as competitors.

Where Aloha Dental leads

One direct organic win: #1 for aloha dental austin, through the Dr. Paulo Mazini team page. No map pack position in this run.

Where others lead

ATX Family Dental leads dentist austin direct results and is #1 in the dentist austin map pack. Austin Dental Spa leads teeth whitening austin direct results and is #2 for root canal austin. Tomblyn Family Orthodontics leads invisalign austin direct results. MyDentalSmiles leads emergency dentist austin direct results. Duggan Endodontics leads root canal austin direct results. Parmer Lane Family Dentistry leads family dentist austin direct results.

Reviews and listings

SERP brand knowledge panel: Aloha Dental, "Dental clinic in Austin, Texas", rating 4.6 with 706 reviews, 1614 E Riverside Dr, Austin, TX 78741, phone (512) 707-7300, hours Monday to Friday 8 AM to 5 PM, Tuesday and Thursday 9 AM to 6 PM, Saturday and Sunday closed. No Places API rating was returned in this run, so no Places rating is claimed. Aloha Dental is in the structured map top 3 for 0 of 7 searches that returned one; no map pack was returned for emergency dentist austin, root canal austin, or the brand search.

6 What to fix first

In the order the fresh data supports. No ranking or AI mention is promised.

1. Work on the map presence

Aloha Dental is in no map top 3 in this run, while the same firms repeat across the packs. Keep the listing name, address, and phone exactly matching the website, and keep building on the 706 reviews shown in the SERP panel.

2. Give every page one main heading

Cut the extra main headings on the 9 pages that have more than 1, starting with dental implants at 6 and the homepage at 5. Keep the page heading as the only main heading and demote the section headings.

3. Rewrite the homepage title

Shorten it from 117 characters to one service phrase, the practice name, and Austin. Fix the general and family dentistry, dental implants, and our team titles the same way, and give the veneers title the brand name it is missing.

4. Add alt text to the 26 images

Start with the homepage at 4 of 26, then the 2 missing images on each of the other 11 pages. This needs no new content, only descriptions of the images already on the pages.

5. Add llms.txt and FAQPage schema

Publish a short llms.txt with your services, address, and phone, and mark up the questions your service pages already answer. Both are low-effort steps toward being quoted in AI answers.

6. Aim the treatment pages at their searches

The treatment pages are well built, but none ranks for its own search. Add the exact search phrase to the first heading and opening paragraph of each treatment page, and build supporting guides that link back to them.

7 What this becomes in 90 days

From fresh data, not a promise.

Days 1 to 30 - Fix the foundations

All quick wins above that do not need new content, plus baseline tracking of the 10 SERP keywords and the SERP AI Overview results, dated 6 November 2026.

Days 31 to 60 - Rebuild the treatment pages

The treatment page rewrites, the thin page expansions, and the first buyer guide for the searches where no direct result appears yet.

Days 61 to 90 - Review results

Check whether the money searches, map packs, and AI overviews have moved, and set next quarter targets. Do not promise a ranking or an AI mention.

What you get every month

AI visibility tracking across the same questions, Google rankings tracking, one to two buyer guides, a technical health check, reviews and listings checks, and a plain-English report with a monthly call.

Want us to fix these, in order?

Start with the map presence, the main headings, and the homepage title, then the alt text and llms.txt, then the treatment page targeting, then the supporting guides. The full findings above are the starting point, not a sales pitch.

Talk through the fixes

Or write to us: **info@xylvar.top** - We reply within 2 business days.

How we did this. We read 12 URLs on 6 November 2026 (titles, headings, word counts, code markup, image descriptions, robots.txt and llms.txt). Google USA results were collected via Bright Data SERP API on 6 November 2026, market USA. Dentist austin and dental clinic austin first returned HTTP 502 with an empty body and no results; both succeeded on retry the same day, and retry results are used. A structured map pack was returned for 7 of 10 searches, and Aloha Dental is in the top 3 for none of them; no map pack was returned for emergency dentist austin, root canal austin, or the brand search. Speed: PageSpeed Insights returned HTTP 429 on 6 November 2026, so no score is claimed. AI Overview data came from the SERP API where present; a top-level overview was returned for 1 of 10 searches, and live Gemini and Bing answers have not been checked yet and are marked as not yet checked in this report. The email published on the site is riverside@aloha-dental.com, found 4 times on the contact page in a direct fetch on 6 November 2026; smile@aloha-dental.com was not found on the homepage or the contact page. Public information only, no logins. This report is complimentary and confidential to Aloha Dental Austin. Unverified in this snapshot: PageSpeed score, Gemini and Bing answers, a Places rating, a single verified review rating, staff count, the contact email smile@aloha-dental.com, and Aloha Dental Austin pricing.
