COMPLIMENTARY SEARCH AND AI VISIBILITY REPORT

How broadband providers find GOCare on Google and in AI answers

We checked your website, your Google rankings, and what Google search results show for AI answers. Here is what we found on 4 November 2026, and the fixes worth making first.

Prepared for
GOCare
Alpharetta GA, SaaS

Prepared by
xylvar
SEO and AI visibility for growing companies

Date
4 November 2026

1 The short version

A fresh snapshot, 4 November 2026. Public pages only, no logins. No email has been sent about this report yet.

AREA	VERDICT	WHAT IT MEANS
Google website rankings	MIXED	GOCare is #1 for its own brand name and #2 for fiber internet customer experience platform through a press release. It does not appear as a direct result in the summary top 9 for the other 8 searches in this run.
AI visibility in search	NOT SHOWN	No SERP AI Overview was returned in the SERP API for any of the 10 searches. Live Gemini, Bing, and Google AI Overview checks have not been done yet and are marked as not done.
Page structure	MIXED	10 of 12 audited pages have exactly 1 main heading. Terms and the 404 page have none reported.
Titles	FIX	Homepage title is 13 characters, "Home - GOCare". No money page title says what the page sells in search terms.
Sitemap	FIX	A 404 page, /404-2/, is in the page sitemap.
Speed	NOT MEASURED	PageSpeed Insights returned HTTP 429 on 4 November 2026. No score is claimed.

Biggest issue: no page matches the generic searches

Every generic money search in this run is won by general CX explainers, large vendors, or editorial pages. There is no dedicated product or solution page in the 12 audited page-sitemap URLs that matches those searches. That is the gap to close first, with a broadband-specific product page, not with a keyword list.

2 Where you rank on Google today

Google US, Bright Data SERP API, 4 November 2026. Direct results only. Google redirect entries are not counted as direct results.

SEARCH	GOCARE	DIRECT LEADERS
broadband customer experience platform	Not in summary top 9 direct	Talkdesk #1, Sonar #2
digital experience platform broadband	Not in summary top 9 direct	Uniform #1, Quora #2
broadband customer engagement software	Not in summary top 9 direct	NewBreed Revenue #1, Airship #2
isp customer experience software	Not in summary top 9 direct	Experience.com #1, University of Mississippi #2. Poor intent match: generic experience results, not ISP software vendors
broadband outage notification software	Not in summary top 9 direct	Reddit #1, LinkedIn #2
gocare	#1, homepage	LinkedIn company page #2
broadband subscriber engagement platform	Not in summary top 9 direct	Telecompetitor #1, Facebook #2
telecom customer experience platform	Not in summary top 9 direct	PwC #1, Salesforce #2
broadband provider customer communication software	Not in summary top 9 direct	Aircall #1, Promptlink #2
fiber internet customer experience platform	#2, Socket Fiber press release page	Lumen #1

Read this carefully: the #6 that is not a #6

For "broadband customer experience platform", rank 6 in the summary is a Google redirect entry titled "Socket Fiber Plugs In GOCare Digital Experience Platform ...". Its final destination is hidden in the redirect URL, so it is not counted as a direct GOCare result in this audit. Do not claim it as a ranking.

Brand search note: ranks 3 to 7 for "gocare" are Google redirect entries whose titles mention GoCare but whose destinations are hidden, including an urgent care clinic title, a school device insurance title, and an app store title. They are not named as competitors here, and they show a name collision risk for the brand search.

3 What AI says in search results

SERP API data only, 4 November 2026. Live Gemini, Bing, and Google AI Overview checks have not been done yet. AI answers change day to day.

No SERP AI Overview returned: 0 of 10

No ai_overview key was returned in any of the 10 SERP records in this run. No AI Overview claim is made for any search from this run. That absence means the SERP API did not return one in this run. It does not prove that a conversational AI tool would give no answer, and it does not prove that GOCare is or is not named by any AI tool.

No map pack returned: 0 of 10

No snack_pack key was returned in the SERP API for any of the 10 searches. No map position is claimed. That fits a national B2B SaaS business, and no local branch was audited.

Live AI checks: not done

Gemini, Bing, and Google AI Overview browser checks were not done in this audit. They must be run separately before any report claims a conversational AI result. Until then, treat AI visibility as unverified, not as zero.

4 What is holding the website back

12 page-sitemap URLs audited on 4 November 2026, 5652 words, 239 images, 33 missing alt text. Press and post pages were not individually audited.

Titles - HIGH

Homepage 13 characters, 404 page 12, videos 15, events 15, why 20, demo 21, testimonials 21, news 22, privacy 23, broadband results 26, form confirmation 33, terms 46. No money page title says what the page sells in the words buyers search for.

404 page in the sitemap - HIGH

/404-2/ is in the page sitemap, is 82 words, and has no H1 reported. Remove it from the sitemap and check that no internal link points to it.

Missing headings - MEDIUM

/terms-and-conditions/ is 2251 words with no H1 reported. /404-2/ also has no H1 reported. The other 10 audited pages have exactly 1 H1 each.

Meta descriptions - MEDIUM

The audit tool reported 204 characters on 11 of 12 pages and 120 on the demo page. Length only is reported, so identical text is not claimed, but the uniformity is worth checking for a repeated sitewide description.

Images without descriptions - MEDIUM

33 of 239 images in the audited set have no alt text, starting with homepage 9 of 52, broadband results 8 of 45, and why 6 of 83.

Schema - MEDIUM

Every audited page reports the same 5 types: BreadcrumbList, EntryPoint, ImageObject, ListItem, Organization. No Product, Service, FAQ, or Article schema was reported in the audited set.

llms.txt - LOW

No llms.txt was found, HTTP 404 on 4 November 2026. That is a gap to check if AI visibility is a goal, not a claim that AI tools cannot read the site at all.

5 How you compare

From SERP direct domain results, 4 November 2026. Google redirect entries are not named as competitors.

Brand search: you win, with a name collision warning

GOCare is #1 for "gocare" through its homepage, ahead of its LinkedIn company page. Other GoCare names appear in redirect titles for different businesses, so brand searchers can land in the wrong place. Clear brand messaging on the homepage and a distinct title help here.

Generic searches: generalists win, not broadband specialists

Talkdesk, Sonar, Uniform, Airship, PwC, Salesforce, Aircall, and Lumen lead the generic searches in this run, alongside explainers and editorial pages. None of them is a broadband-only product page in the top results shown, which means the opening is a broadband-specific product page, not a fight on generic CX terms alone.

Proof exists, but it is in a press release

The #2 fiber result is a Socket Fiber press release, not a product page. That proof is strong, but a press release does not sell the platform the way a product page can. Turn that proof into a product page and a short guide for each broader search.

6 Quick wins, in order

- Rewrite the money page titles, starting with homepage, broadband results, and why, in the words broadband providers search for.
- Remove /404-2/ from the sitemap and check internal links to it.
- Add a clear H1 to the terms page.
- Check the meta descriptions for a repeated sitewide description, and write a distinct description for each money page.
- Add alt text to the 33 images missing it, starting with homepage, broadband results, and why.

- Build a broadband-specific product page, linked from homepage and why, covering integration, outage updates, and self-service.
- Turn the fiber press release proof into a product page and a short guide for each broader search.
- Decide on llms.txt, and add Service or FAQ schema to money pages after checking those pages individually.

7 What this becomes in 90 days

A shape, not a promise. No ranking or AI mention is promised.

Days 1 to 30 - Fix the foundations

All quick wins above that do not need new pages, plus baseline tracking of the 10 SERP keywords, dated 4 November 2026.

Days 31 to 60 - Build the missing page

New broadband product page, first buyer guide, Service and FAQ schema checks on money pages, llms.txt decision.

Days 61 to 90 - Review and set next targets

Review results, check whether the generic searches have moved, and set next quarter targets.

Want to talk through the fixes?

This snapshot covered the headlines. If you would like to talk through the fixes in order for GOCare, use the link below.

Talk through the fixes

How we did this. We read 12 page-sitemap URLs on 4 November 2026 (titles, headings, word counts, code markup, image descriptions, robots.txt and llms.txt). Google US results were collected via Bright Data SERP API on 4 November 2026, market US. No map pack was returned in the SERP API for any search. Speed: PageSpeed Insights returned HTTP 429 on 4 November 2026, so no score is claimed. AI Overview data came from the SERP API where present; in

this run no AI Overview was returned for any search, and live Gemini and Bing answers have not been checked yet. Public information only, no logins. This report is complimentary and confidential to GOCare. Unverified in this snapshot: PageSpeed score, Gemini and Bing answers, press and post page schema and counts, sitemap entry counts, a single review count or rating, and whether meta description text is identical on the 11 pages reporting 204 characters.
