COMPLIMENTARY SEARCH AND AI VISIBILITY REPORT

How buyers find Kiwi Homes on Google and in AI answers

We checked your website, your Google rankings, and SERP AI Overview data. Live AI answers have not been checked yet. Here is what we found on 4 November 2026, and the fixes worth making first.

Prepared for
Kiwi Homes
Birmingham, builder of luxury homes

Prepared by
xylvar
SEO and AI visibility for growing companies

Date
4 Noven

1 The short version

A fresh snapshot, 4 November 2026. Public pages only, no logins. No email has been sent about this report yet.

AREA	VERDICT	WHAT IT MEANS
Google website rankings	MIXED	Kiwi is #1 for luxury home builders birmingham and for kiwi homes, through the homepage. It does not appear as a direct result in the summary top 8 or 9 for the other 9 searches in this run.
Map packs	GAP	A map pack was returned for 7 of the 10 searches, and Kiwi appears in none of them in this run.
AI visibility in search	PARTIAL	A SERP AI Overview was returned for only 1 of 10 searches, and Kiwi is not named in it. Live Google, Gemini and Bing answers have not been checked yet.
Page structure	MIXED	6 of 10 audited pages have exactly 1 main heading. 4 pages have duplicate main headings.
Images	FIX	157 of 198 images across the 10 audited pages have no alt text. Worst: projects 114 of 115.
Speed	NOT MEASURED	No PageSpeed score is claimed in this audit. Speed is unverified, not good or bad.

Biggest issue: the proof pages are the weakest pages

The projects page is the gallery of past work, yet it has no meta description, duplicate main headings, and 114 of 115 images missing alt text. Fix that page first, then the duplicate headings and alt text elsewhere.

Biggest opportunity: the near-me and development pages

Kiwi already has pages for Harborne, Solihull and its own developments, but it does not appear for those searches in this run. Those pages are thin and short titled, and strengthening them is the direct route to those searches.

2 Where you rank on Google today

Google UK, Bright Data SERP API, 4 November 2026. Direct domain results only for competitor names; Google redirect entries are not named as competitors.

SEARCH	KIWI POSITION	PAGE GOOGLE SHOWS
luxury home builders birmingham	#1	Homepage
kiwi homes	#1 on retry	Homepage
luxury house builders birmingham	Not in summary top 8	None as a direct result
bespoke home builders birmingham	Not in summary top 9	None as a direct result
new homes harborne	Not in summary top 9	None as a direct result
new homes solihull	Not in summary top 9	None as a direct result
luxury home renovations birmingham	Not in summary top 9	None as a direct result
house extensions birmingham	Not in summary top 8	None as a direct result
luxury home builders west midlands	Not in summary top 9	None as a direct result
bespoke house builders west midlands	Not in summary top 9	None as a direct result

Who is ahead, direct domains only

Luxury home builders birmingham: none ahead, Francis Homes next at #2. Luxury house builders birmingham: Kingswood Homes #1. Bespoke home builders birmingham: MTP Builders #1. New homes harborne: McHugh Homes #1, Taylor Wimpey #2. New homes solihull: Smart Homes #1, David Wilson Homes #2. Luxury home renovations birmingham: JQ Luxury #1. Luxury home builders west midlands: Hawkstone Developments #1. Bespoke house builders west midlands: Gravitas Build #1. House extensions birmingham: the top direct results in the summary are for the House TV series, not builders, so no builder competitor is named from that summary.

Brand search note

The first kiwi homes SERP run returned HTTP 502 with a captcha error and no results. It was retried once and then succeeded with Kiwi #1. The brand #1 is from the retry, not from the failed first run.

Map packs

A map pack was returned for 7 searches, and Kiwi appears in none of them. Map leaders in this run, SERP map pack data only: Mountainview Construction Design and Build, 5.0 with 19 reviews, leads the luxury house builders, bespoke home builders, and luxury home renovations map packs; Smart Homes, 4.8 with 994 reviews, leads new homes solihull; Extension Hub, 4.8 with 39 reviews, leads house extensions; LPH Construction, 4.9 with 40 reviews, leads luxury home builders west midlands; Tatton Hall Homes, 4.4 with 16 reviews, leads bespoke house builders west midlands. No Kiwi rating or review count is claimed in this audit.

Pattern: Kiwi wins only where the search matches its homepage title and brand exactly. The near-me and bespoke searches, which match pages Kiwi already has, do not show Kiwi in this run.

3 What AI says in search results

SERP AI Overview data only, 4 November 2026. Live Google AI Overview, Gemini and Bing answers have not been checked yet. AI answers change day to day.

Named in a SERP AI Overview

None. No SERP AI Overview in this run names Kiwi.

Not named in a SERP AI Overview

New homes solihull: an AI Overview was returned, but Kiwi is not named in the overview text seen. Developments and builders named there include Bellway Homes and David Wilson Homes, among others. No prices from that overview are reproduced here.

No SERP AI Overview returned

No AI Overview was returned in the SERP API record for the other 9 searches in this run. That does not prove a conversational AI tool would give no answer. Those tools have not been checked yet, and no conversational AI result is claimed in this report.

4 What is holding the website back

10 URLs audited on 4 November 2026, 4565 words, 198 images, 157 missing alt text.

Projects page: no meta description, duplicate headings, almost no alt text - HIGH

Projects has a 21 character title, no meta description at all, 2 main headings (Projects, Gallery of Past Work), and 114 of 115 images missing alt text. That page is the proof of past work, so fix it first.

Duplicate main headings - HIGH

About has About Us twice, developments has Developments and Buchanan Oaks, professionals has Professional Collaborations twice, projects has Projects and Gallery of Past Work. The homepage, residential, contact, near-me, Serpentine Mews and Swiss Cottage pages each have exactly 1 main heading.

Images without descriptions - HIGH

157 of 198 images in the audited set have no alt text. After projects, the worst are about 13 of 14, professionals 8 of 8, residential 5 of 5, and homepage 7 of 11. Start with project and team photos, where a buyer is actually looking.

Thin and short titled pages - MEDIUM

Contact is 126 words, Serpentine Mews is 203 words, Swiss Cottage is 210 words, near-me is 266 words. Short titles: near-me 20 characters, projects 21, Swiss Cottage 26, Serpentine Mews 28. No audited title is over 60 characters. The residential title starts with a lowercase word, a small consistency fix.

Schema is thin for buyer questions - MEDIUM

Every audited page has Organization, WebPage and WebSite schema, plus BreadcrumbList on most pages. No FAQPage schema was found in the audited set. Add FAQ schema only to questions already answered on those pages.

Sitemap template page to check - MEDIUM

Rosedale-template appears in the pages sitemap list. Check it live, and remove or noindex it if it is not a real public page. Do not delete it on the sitemap list alone.

What is already strong

Homepage title and main heading match the head search closely, homepage has 847 words and a clear main heading, residential has 695 words and a clear main heading, and every audited page canonicals to itself. No duplicate content pairs were found in this 10 URL set.

5 How you compare

From SERP direct domain results, 4 November 2026. Google redirect entries are not named as competitors.

Head term: you lead

For luxury home builders birmingham, Kiwi is #1 through the homepage, ahead of Francis Homes at #2. That is the strongest result in the set, and the homepage should keep that title and heading close to that search.

Bespoke and renovation searches: you do not appear

For bespoke home builders birmingham, MTP Builders leads. For luxury home renovations birmingham, JQ Luxury leads, even though Kiwi has a residential page for luxury home renovations in Birmingham. The page exists, but it does not appear in this run, which points to content and title strength, not to a missing page.

Near-me searches: you do not appear

For new homes harborne, McHugh Homes and Taylor Wimpey lead. For new homes solihull, Smart Homes and David Wilson Homes lead. Kiwi has a near-me page and Harborne and Solihull development pages, but none appear in the summary top 9 in this run. Those pages are thin and short titled, as set out in section 4.

Map packs: others lead, you do not appear

Mountainview Construction Design and Build leads three map packs in this run, with a 5.0 map pack rating and 19 reviews in that map pack data. That is a local visibility gap to close by checking the Google Business Profile for name, category, address and service area, consistent with the website. That profile was not checked in this audit, so no profile fix is claimed here.

6 Quick wins, in order

- Fix the projects page first: add a real meta description, fix the duplicate main headings, and add alt text to its 114 images missing it.
- Fix duplicate main headings on about, developments and professionals, so each page has one clear main heading.
- Add alt text to about (13 of 14), professionals (8 of 8), residential (5 of 5), and homepage (7 of 11), starting with project and team photos.
- Strengthen near-me, Serpentine Mews and Swiss Cottage with useful, plain introductions for each area and development, and area and development names in the titles.
- Give the contact page more than a form: add a short paragraph about what happens after an enquiry, who replies, and what a first conversation covers.
- Check the sitemap template page rosedale-template, and remove or noindex it if it is not a real public page, after confirming it live.
- Add FAQ schema to money pages, starting with residential and developments, only for questions already answered on those pages.
- Check the Google Business Profile for name, category, address and service area, consistent with the website, to close the map pack gap.
- Keep the homepage title and main heading close to luxury home builders birmingham, and link the homepage clearly to residential, developments and projects, so head term strength carries to the pages that should win the near-me and bespoke searches.

7 What this becomes in 90 days

From fresh data, not a promise. No ranking or AI mention is promised.

Days 1 to 30: fix the foundations

All quick wins above that need no new content strategy, plus baseline tracking of the 10 SERP keywords and the SERP AI Overview results, dated 4 November 2026.

Days 31 to 60: rebuild the money pages

Near-me and development page rebuilds, contact page rebuild, FAQ schema checks, sitemap template check, map pack profile check.

Days 61 to 90: review and set next targets

Review results, check whether the Harborne, Solihull, bespoke and renovation searches have moved, and set next quarter targets. Do not promise a ranking or an AI mention.

How we did this. We read 10 URLs in your sitemap and site on 4 November 2026 (titles, headings, word counts, code markup, image descriptions). Google UK results were collected via Bright Data SERP API on 4 November 2026, market UK, with the brand keyword retried once after a first HTTP 502 captcha. No map pack was returned for Kiwi in this run. Speed: no PageSpeed score is claimed, as no scored check was run in this audit. AI Overview data came from the

SERP API where present; live Google, Gemini and Bing answers have not been checked yet and are not claimed in this report. Public information only, no logins. This report is complimentary and confidential to Kiwi Homes. Unverified in this snapshot: PageSpeed score, live AI answers, Google Business Profile details, Kiwi rating or review count, sitemap entry counts and lastmods, robots.txt rules, llms.txt presence, and project counts from the about page numbers section.
