COMPLIMENTARY SEARCH AND AI VISIBILITY REPORT

How clients find Trew Knowledge on Google and in AI answers

We checked your website, your Google rankings, and what Google search results show. Here is what we found on 4 November 2026, and the fixes worth making first.

Prepared for
Trew Knowledge Inc.
Toronto, digital and web marketing agency

Prepared by
xylvar
SEO and AI visibility for growing companies

Date
4 November 2026

1 The short version

A fresh snapshot, 4 November 2026. Public pages only, no logins. No email has been sent about this report yet.

AREA	VERDICT	WHAT IT MEANS
Google website rankings	FIX	Trew does not appear as a direct result in the summary top 9 for any of the 9 money searches in this run. Brand search is #1, through the news page, not the homepage.
AI visibility in search	NOT MEASURED LIVE	No AI Overview was returned in the SERP API for any of the 10 searches in this run. Live Gemini, Bing and Google AI Overview checks were not done in this audit and no conversational AI result is claimed.
Page structure	STRONG	Every one of the 12 URLs audited has exactly 1 main heading. That is a strength to keep.
Image descriptions	FIX	153 of 297 images across the audited pages have no alt text.
Titles and descriptions	WATCH	Homepage title is 26 characters with no service or Toronto wording. Homepage and about share the same 254 character meta description.
Business details	WATCH	Organization and Service schema are present, but no FAQ schema was found on any audited page, and llms.txt returns 404.
Speed	NOT MEASURED	PageSpeed Insights returned HTTP 429 on 4 November 2026. No score is claimed.

Biggest issue: Trew wins only its own brand search, and even there Google shows the news page, not the homepage. No service page appears in the summary top 9 for any money search in this run.

Quickest win: Give the homepage and services hub a search job. Rewrite the homepage title and the services introduction around enterprise WordPress and web design in Toronto, and add alt text, starting with managed services, artificial intelligence, and customer insights.

2 Where you rank on Google today

Google Canada, Bright Data SERP API, 4 November 2026. Direct domain results only. Google redirect entries hide their final destination, so they are not named as competitors here.

SEARCH	WEBSITE	PAGE GOOGLE SHOWS	WHO IS AHEAD IN DIRECT RESULTS
web design agency toronto	Not in summary top 9	None	Parachute Design Group, Kinex Media
digital marketing agency toronto	Not in summary top 9	None	Digital Agency Network, GrowMe Marketing
enterprise wordpress agency	Not in summary top 9	None	WP Swings, Liquid Web
wordpress development company toronto	Not in summary top 9	None	Clutch, CS Web Solutions
web development agency toronto	Not in summary top 9	None	Casa Media House, ITW Consulting
digital agency toronto	Not in summary top 9	None	Thrive Agency, Jives Media
UX design agency toronto	Not in summary top 9	None	Superside, Brainbox Labs
web design toronto	Not in summary top 9	None	Parachute Design Group, Kinex Media
digital strategy agency toronto	Not in summary top 9	None	Preeminent Marketing, Jives Media
trew knowledge	#1	News page, not homepage	ZoomInfo, company profile

The pattern is clear: the site is not losing by a small margin on one search. It is absent from the summary top 9 for every money search in this run, while list pages, ranking sites, and other agencies take the direct results.

Map results, SERP API, 4 November 2026

Map packs were returned for 7 of the 10 searches. Trew Knowledge is not in any returned map top 3. Examples: web design agency toronto shows ThrillX Design, Pixelcarve, and Canadian Web Designs; digital marketing agency toronto shows World Famous Digital Marketing Agency, dNOVO, and Social Media 55; wordpress development company toronto shows Warren Groom WordPress Developer, Timofey.ca, and WireTree. Full map lists are in the findings file.

Brand knowledge panel, SERP API, 4 November 2026

For trew knowledge, the knowledge panel shows Trew Knowledge as a marketing agency in Toronto, Ontario, phone (647) 289-6838, rating 5, with only 2 reviews. That rating must not be presented as a large review base. Grow the review base honestly, from real clients after real work, rather than inventing or buying reviews.

3 What AI says in search results

SERP API data only, 4 November 2026. Live Gemini, Bing and Google AI Overview browser checks were not done in this audit. AI answers change day to day.

No SERP AI Overview returned

No ai_overview key was returned in the SERP API record for any of the 10 searches in this run, including the 2 retry searches. That means the SERP API did not return an AI Overview in this run. It does not prove that a conversational AI tool would give no answer, and no Gemini or Bing result is claimed in this report.

What that means, plainly

Without a page that clearly answers the money searches, and without an llms.txt file, AI tools have less clear, factual material to quote from Trew itself. The fix is the same as the ranking fix: clear service pages, plain language about what each service delivers, work examples, and an llms.txt file, all based on real work.

Live AI checks are for a later step. Until they are run, this report claims no conversational AI result for Trew Knowledge.

4 What is holding the website back

12 URLs audited on 4 November 2026, 6092 words, 297 images, 153 missing alt text.

No money search page in the top 9 - HIGH

Trew does not appear as a direct result in the summary top 9 for any of the 9 money searches. The homepage title carries no service or Toronto wording, and the services hub is only 198 words.

Brand search lands on news, not homepage - HIGH

For trew knowledge, Google shows the news page first, not the homepage. Strengthen the homepage title and internal links so the homepage is the clearer brand landing page.

Images without descriptions - HIGH

153 of 297 images have no alt text, including 18 of 23 on managed services, 17 of 22 on artificial intelligence, and 17 of 24 on customer insights.

Thin money pages - HIGH

Services hub 198 words, contact 265 words, homepage 310 words, managed services 432 words, customer insights 474 words. These pages do not yet carry the detail a buyer, or a search engine, needs.

Titles and shared description - MEDIUM

Homepage 26 characters, work 26, about 27, design 28, contact 29, services 30, approach 30. Homepage and about share the same 254 character meta description. Give each page its own title and description.

No FAQ schema, no llms.txt - MEDIUM

No FAQPage schema was found on any audited page. Fetching llms.txt returns HTTP 404. Add FAQ schema only where the page actually carries the questions and answers, and add a factual llms.txt file.

Speed - NOT MEASURED

PageSpeed Insights returned HTTP 429 on 4 November 2026. No score is claimed.

What is already working: Every audited page has exactly 1 main heading. All audited pages canonical to themselves. Organization schema is present on every audited page, and Service schema is present on the 6 service pages. Robots.txt is present with no disallow, and the sitemap index is listed there.

5 How you compare

From SERP direct domain results, 4 November 2026. Google redirect entries are not named as competitors, because their final destination is hidden in the redirect URL.

BRAND OR SITE	WHAT THEY DO THAT YOU DO NOT (YET) IN THIS SNAPSHOT
Trew Knowledge (you)	Brand search #1 through news, not homepage. No money search in the summary top 9.
Parachute Design Group	#1 for web design agency toronto and for web design toronto in direct results.
Kinex Media	#2 for web design agency toronto and for web design toronto in direct results.
Clutch	#1 for wordpress development company toronto in direct results, as a rankings list.
Casa Media House	#1 for web development agency toronto in direct results.
Thrive Agency	#1 for digital agency toronto in direct results.

The gap is not that Trew is unknown. It is that the pages Google shows for these searches are other agencies, list pages, and ranking sites, while no Trew service page is in the summary top 9.

6 Quick wins, in order

- Rewrite the homepage title and services hub introduction around enterprise WordPress and web design in Toronto.
- Give each service page a distinct title and introduction, starting with design, consulting, customer insights, and managed services.
- Add alt text to the 153 images missing it, starting with managed services, artificial intelligence, and customer insights.

- Give homepage and about their own meta descriptions, and lengthen the work and contact descriptions only where the page content supports it.
- Add FAQ schema to service pages only where the page actually carries the questions and answers.
- Add a factual llms.txt file.
- Strengthen homepage internal links so brand search lands on the homepage, not the news page.
- Build one useful page per money search that is currently lost, starting with enterprise WordPress and Toronto web design, with work examples and a clear next step.
- Grow the review base honestly, from real clients after real work.

7 What this becomes in 90 days

Days 1 to 30 - Fix the foundations

Quick wins 1 to 4 above. Baseline tracking of the 10 Google searches and the SERP AI Overview results, dated 4 November 2026.

Days 31 to 60 - Build the answers

Service page rebuilds, FAQ schema, llms.txt, first two service guides with work examples.

Days 61 to 90 - Get found

Review results, check whether any money search has moved into the summary top 9, and set next quarter targets.

What you get every month: Google rankings tracking, AI visibility tracking, one to two service guides, a technical health check, reviews and listings checks, and a plain-English report with a monthly call.

A fair way to start: A 3-month starting term, clear targets agreed up front, then month to month. We do not promise number one rankings or guaranteed AI mentions, because nobody honestly can. We promise the work, and a report that shows you exactly what it did.

Want to talk through the fixes?

How we did this. We read 12 URLs in your sitemap on 4 November 2026 (titles, headings, word counts, code markup, image descriptions, robots.txt and llms.txt). Google Canada results were collected via Bright Data SERP API on 4 November 2026, market Canada, with 2 keywords retried after proxy errors. Speed: PageSpeed Insights returned HTTP 429 on 4 November 2026, so no score is claimed. AI Overview data came from the SERP API where present, and no AI Overview was returned for any of the 10 searches in this run. Live Gemini, Bing and Google AI Overview browser checks were not done in this audit. Public information only, no logins. This report is complimentary and confidential to Trew Knowledge Inc. Unverified in this snapshot: PageSpeed score, live AI answers, work and sector page details beyond sitemap counts, post page details beyond the 415 post count, and any Places API rating.
