COMPLIMENTARY SEARCH AND AI VISIBILITY REPORT

How people find Zip Mechanical on Google and in AI answers

We checked your website, your Google rankings, and what Google AI says in search results. Here is what we found on 6 November 2026, and the fixes worth making first.

Prepared for
Zip Mechanical
Seattle, residential and commercial HVAC

Prepared by
xylvar
SEO and AI visibility for growing companies

1 The short version

A fresh snapshot, 6 November 2026. Public pages only, no logins. No email has been sent about this report yet.

AREA	VERDICT	WHAT IT MEANS
Google website rankings	BRAND ONLY	#1 for the brand search, but through the commercial refrigeration page, not the homepage. No direct result in the summary top 8 or 9 for any of the 9 money searches.
Google map packs	NOT IN TOP 3	A structured map top 3 was returned for all 9 money searches, and Zip is in none of them. No map pack was returned for the brand search.
AI visibility in search	NOT NAMED	No AI Overview was returned for any of the 10 searches, so Zip is named in 0 of 0 returned overviews. Live Gemini and Bing answers have not been checked yet.
Page titles	MOSTLY FINE	10 of 12 audited titles are within 60 characters. Maintenance agreements at 69 and residential installation at 63 run over.
Page structure	WATCH	Alt text is clean, 0 of 138 images missing it, but one page has no main heading, one page has 2, and the installation page carries a repair heading.
Business details	STRONG	Your contact email info@zipmechanical.com is verified on the site, and your SERP knowledge panel shows a 4.7 rating with 86 reviews.
Speed	NOT MEASURED	PageSpeed Insights returned HTTP 429 on 6 November 2026, so no score is claimed in this report.

Biggest strength: the brand search and the clean images

Zip is #1 for its own name search, and every image on the 12 audited pages has alt text, 0 of 138 missing. The contact email is verified on the site, and the knowledge panel shows the company, its Seattle address, phone, and 4.7 with 86 reviews.

Biggest issue: the money searches show no Zip page, and the map packs do not either

No direct result appears for hvac company seattle, hvac contractor seattle, air conditioning repair seattle, ac repair seattle, heating repair seattle, hvac installation seattle, furnace repair seattle, heat pump installation seattle, or emergency hvac seattle, and Zip is in none of the map top 3s. The pages that do rank are other Seattle companies, directories, and review sites, not your service pages.

2 Where you rank on Google today

Google USA, Bright Data SERP API, 6 November 2026. Direct-domain results only. Google redirect entries are not named as competitors, because their final destination is hidden in the redirect URL.

SEARCH	ZIP	WHO IS AHEAD
hvac company seattle	Not in top 8	angi.com #1, nwmechanical.com #2
hvac contractor seattle	Not in top 8	evergreenhvac.com #1, hvacinformed.com #2
air conditioning repair seattle	Not in top 8	seatownservices.com #1, yelp.com #2
ac repair seattle	Not in top 8	homedepot.com #1, evergreenhomeheatingandenergy.com #2
heating repair seattle	Not in top 9	nwmechanical.com #1, angi.com #2
hvac installation seattle	Not in top 8	yelp.com #1, reddit.com #2
furnace repair seattle	Not in top 9	yelp.com #1, seatownservices.com #2
heat pump installation seattle	Not in top 9	facebook.com #1, daikinseattle.com #2
emergency hvac seattle	Not in top 9	imdb.com #1, wikipedia.org #2, see note below
zip mechanical seattle	#1 through the commercial refrigeration page	youtube.com #2, your own Meet ZIP MECHANICAL video

The emergency search returned the wrong thing entirely

For emergency hvac seattle, the direct top 2 are IMDb and Wikipedia for the 1970s TV series "Emergency!", not HVAC companies. That is a failed intent match, not a normal ranking miss, and no direct HVAC leader is named for that search. The map pack for the same search does return HVAC companies, with Beacon Plumbing first.

The brand search points at a service page, not the homepage

For zip mechanical seattle, the only direct Zip result is the commercial refrigeration page at #1. The homepage does not appear as a direct result in the brand summary top 9. That is unusual for a company of this size, and worth checking before anything else.

Method note: all 10 searches returned ok on the first run on 6 November 2026, no retries were needed. Summary top counts are 8 to 9 per search, because that is how many organic rows the SERP summary returned.

3 What AI says in search results

Google AI Overview data captured through the SERP API, 6 November 2026. Live Gemini and Bing answers have not been checked yet. AI answers change day to day.

No overview returned for any of the 10 searches

A top-level AI Overview key was returned for 0 of 10 searches, so Zip is named in 0 of 0 returned overviews. That is a blank in this snapshot, not a named miss: Google returned no AI Overview to name anyone in.

What that does not prove

Absence in the SERP API does not prove a conversational AI tool would give no answer. Live Gemini, Bing, and Google AI Overview conversational checks were not done in this task, and no conversational AI result is claimed in this report.

Your llms.txt is missing, and your schema is thin

Unlike most companies in this batch, your llms.txt returns a 404, and only the homepage carries any schema markup, with no Organization, LocalBusiness, HVACBusiness, Service, or FAQPage type on any audited page. An llms.txt file and service schema are the clean sources AI tools can quote, so both are worth adding.

Note for the owner: live Gemini, Bing, and Google AI Overview conversational checks were not done in this task, per task instruction, and no conversational AI result is claimed in this report.

4 What is holding the website back

12 URLs audited on 6 November 2026, 10,596 words, 138 images, 0 missing alt text.

Money searches show no Zip page - HIGH

No direct result for any of the 9 money searches, and Zip is in none of the map top 3s. The service pages exist, air conditioning, furnace repair, heat pumps, mini split, commercial refrigeration, commercial HVAC, and residential installation, with real content, 776 to 1,072 words each, but none of them is the ranked answer for its own search. The gap is authority and visibility, not missing pages.

Main headings need attention - MEDIUM

The heating-and-cooling-company page has no main heading at all, the maintenance page has 2, one of them empty, and the residential installation page carries the heading "Heating and Cooling Repair Seattle, WA", the same heading as the repair page. Fix those three before anything else on the pages.

Two meta descriptions run long - MEDIUM

Residential installation at 228 characters and furnace repair at 202 are over 160. The other 10 metas are in the 116 to 157 range. Shorten the two long ones to one plain sentence each.

Two titles run long - LOW

Maintenance agreements at 69 characters and residential installation at 63 are over 60. The other 10 titles are in the 47 to 57 range.

Schema is homepage only - LOW

Only the homepage carries schema markup, ImageObject, SearchAction, WebPage, and WebSite. The other 11 audited pages carry none, and no Organization, LocalBusiness, HVACBusiness, Service, or FAQPage type was found anywhere.

A typo lives in a sitemap URL - LOW

The sitemap lists /heatin-and-air-conditioning-repair-service-seattle-wa/, spelled "heatin" with no g. The page itself loads, but the typo is worth fixing so the address matches the service it describes.

What is clean

Alt text is perfect across the set: 0 of 138 images missing it. Every canonical tag points to its own live URL. No service page is thin, the thinnest audited page is contact at 555 words. Your contact email info@zipmechanical.com is verified on the site, on the homepage and the contact page.

5 How you compare

From SERP direct domain results and map packs, 6 November 2026. Google redirect entries are not named as competitors.

Where Zip leads

One direct organic #1 in this run, the brand search, through the commercial refrigeration page. In the map packs, Zip is in none of the top 3s for any of the 9 money searches.

Where others lead

Greenwood Heating and Home Services leads 8 of the 9 map packs at #1, with 4.9 and 5,100 reviews. NW Mechanical leads heating repair direct results. SeaTown Services leads air conditioning repair and furnace repair direct results. Evergreen Home Heating leads ac repair direct results at #2 behind Home Depot. Directories and review sites lead several searches outright.

Reviews and listings

SERP brand knowledge panel: Zip Mechanical, "Heating contractor in Seattle, Washington", rating 4.7 with 86 reviews, 309 S Cloverdale St Unit D43, Seattle, WA 98108, phone (206) 401-1919, hours Closed, Opens 8 AM. No Places API rating was returned in this run, so no Places rating is claimed. No map pack was returned for the brand search.

6 What to fix first

In the order the fresh data supports. No ranking or AI mention is promised.

1. Check why the homepage is not the brand result

The brand search returns the commercial refrigeration page at #1, with no homepage in the top 9. Check the homepage canonical, title, and internal links before spending on anything else.

2. Fix the three heading problems

Add a main heading to the heating-and-cooling-company page, remove the empty second heading on the maintenance page, and give the residential installation page its own installation heading instead of the repair heading it shares with the repair page.

3. Shorten the 2 long meta descriptions and 2 long titles

Cut residential installation at 228 characters and furnace repair at 202 to one plain sentence each, and shorten the maintenance and residential installation titles to fit inside 60 characters.

4. Add service and FAQ schema, and an llms.txt file

Mark up the service pages with Service and FAQPage schema, add an Organization or LocalBusiness type, and publish an llms.txt file so AI tools have a clean source to quote.

5. Aim the service pages at their searches

The service pages are deep, but none ranks for its own search. Add the exact search phrase to the first heading and opening paragraph of each service page, and build supporting guides that link back to them.

6. Fix the sitemap typo

Correct "heatin" to "heating" in the repair page address in the sitemap, so the listed address matches the service it describes.

7 What this becomes in 90 days

From fresh data, not a promise.

Days 1 to 30 - Fix the foundations

All quick wins above that do not need new content, plus baseline tracking of the 10 SERP keywords and the SERP AI Overview results, dated 6 November 2026.

Days 31 to 60 - Rebuild the service pages

The service page rewrites, the title and meta fixes, and the first buyer guide for the searches where no direct result appears yet.

Days 61 to 90 - Review results

Check whether the money searches, map packs, and AI overviews have moved, and set next quarter targets. Do not promise a ranking or an AI mention.

What you get every month

AI visibility tracking across the same questions, Google rankings tracking, one to two buyer guides, a technical health check, reviews and listings checks, and a plain-English report with a monthly call.

Want us to fix these, in order?

Start with the brand search, the three heading problems, and the long titles and metas, then the schema and llms.txt, then the service page targeting, then the supporting guides. The full findings above are the starting point, not a sales pitch.

Talk through the fixes

Or write to us: **info@xylvar.top** - We reply within 2 business days.

How we did this. We read 12 URLs on 6 November 2026 (titles, headings, word counts, code markup, image descriptions, robots.txt and llms.txt). Google USA results were collected via Bright Data SERP API on 6 November 2026, market USA. All 10 searches returned ok on the first run, no retries were needed. A structured map pack was returned for 9 of 10 searches, and Zip is in the top 3 for none of them; no map pack was returned for the brand search. Speed: PageSpeed Insights returned HTTP 429 on 6 November 2026, so no score is claimed. AI Overview data came from the SERP API where present; a top-level overview was returned for 0 of 10 searches, and live Gemini and Bing answers have not been checked yet and are marked as not yet checked in this report. Meta descriptions in this report are the real meta tags, verified by direct fetch on 6 November 2026; the audit tool's meta length figures were not used, because that tool concatenated page body text into the meta field. Public information only, no logins. This report is complimentary and confidential to Zip Mechanical. Unverified in this snapshot: PageSpeed score, Gemini and Bing answers, a Places rating, a single verified review rating, staff count, and Zip Mechanical pricing.
